About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

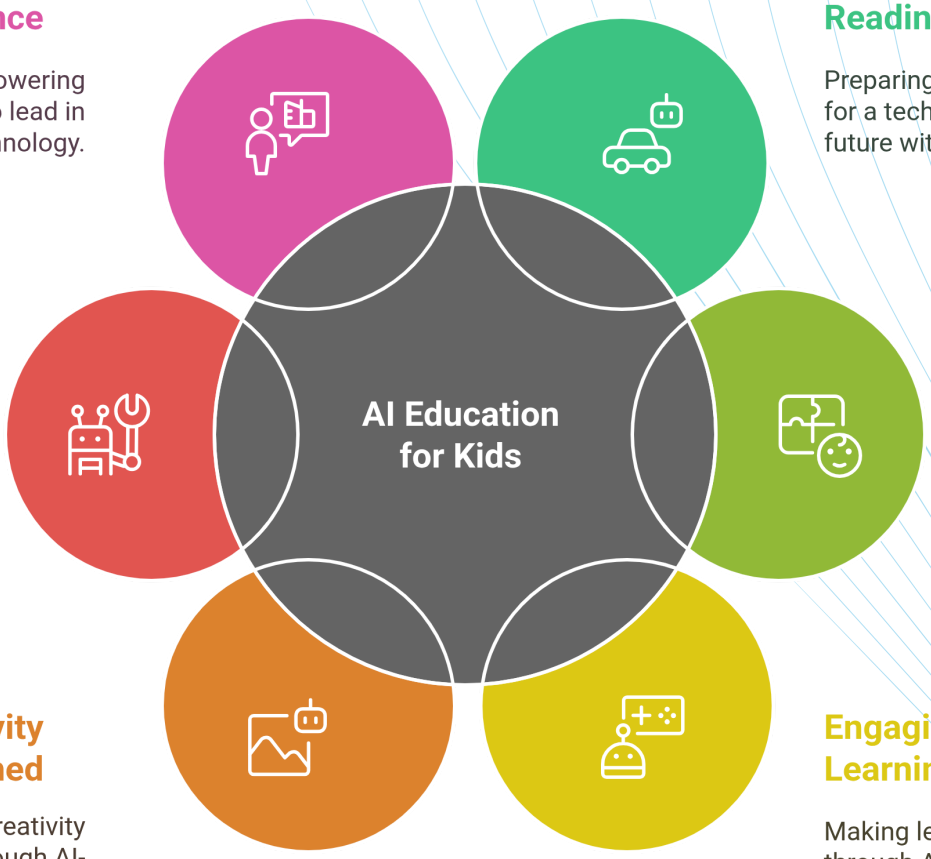
Benefits of AI Education for Kids

Leadership Confidence

Empowering children to lead in technology.

Future Readiness

Preparing children for a tech-driven future with AI skills.



Practical Skills

Equipping children with real-world tech skills.

Logical Thinking

Enhancing problem-solving and decision-making abilities.

Creativity Unleashed

Fostering creativity through AI-generated art and music.

Engaging Learning

Making learning fun through AI-powered games and projects.

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 — NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 — BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 — STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 — Project-Based Learning

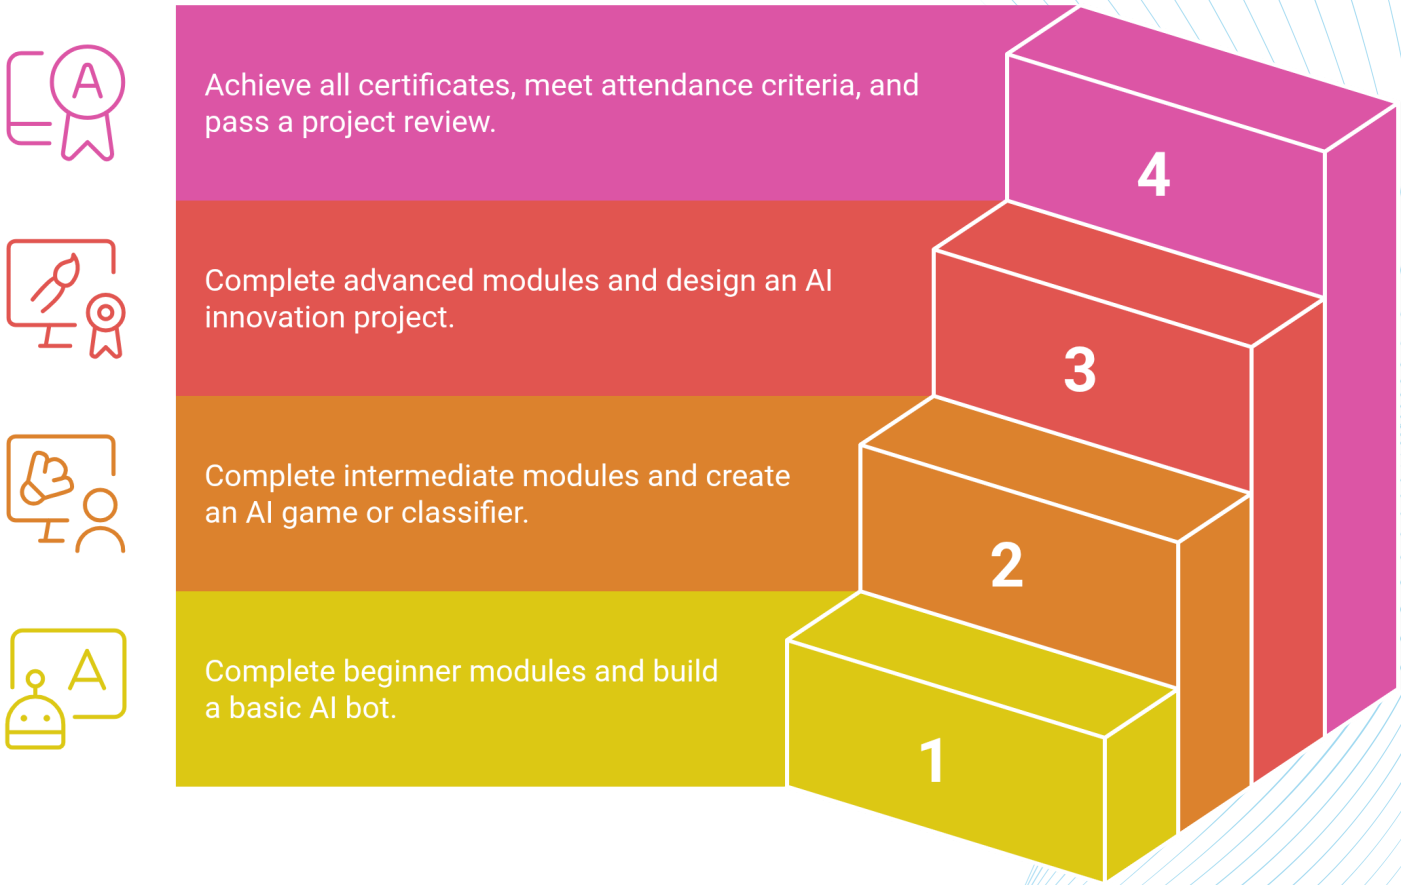
Offers project-based learning in game, app, web development, and more.

AI Explorer Course – Overview

A fun, interactive course for kids to explore Artificial Intelligence. From building chatbots to training AI models, students learn how AI thinks, sees, and talks through hands-on projects and real-life examples. Perfect for future innovators!

📚 72+ Classes
🎮 5+ Projects
📖 10+ Quizzes

Future Innovator - AI Explorer Certification Path



Key Learnings

- ✅ How AI thinks, learns & improves
- ✅ NLP, CV, APIs & automation basics
- ✅ Ethical AI & bias awareness
- ✅ Real-world AI problem solving

Achievements

- ✅ Trained real AI models
- ✅ Built smart web/apps
- ✅ Used pro-level AI APIs
- ✅ Created impact-driven projects

AI Explorer Course – Overview

Level 1 – Beginner
(24 Classes → 5 Modules)

Understanding AI

Learn the basics of AI, machine learning, and deep learning.

Learning Models

Discover supervised, unsupervised, and reinforcement learning.

AI in Daily Life

Analyze AI applications in various industries.

Data as Fuel

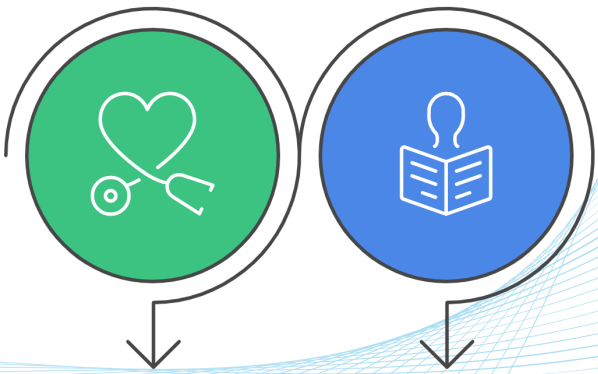
Explore different types of data and their role in AI learning.

Model Training

Train an AI model for image and sound recognition.

Made with Napkin

Featured Projects



Health Assistant

Voice assistant providing health tips

News Recommender

AI recommends news based on interests

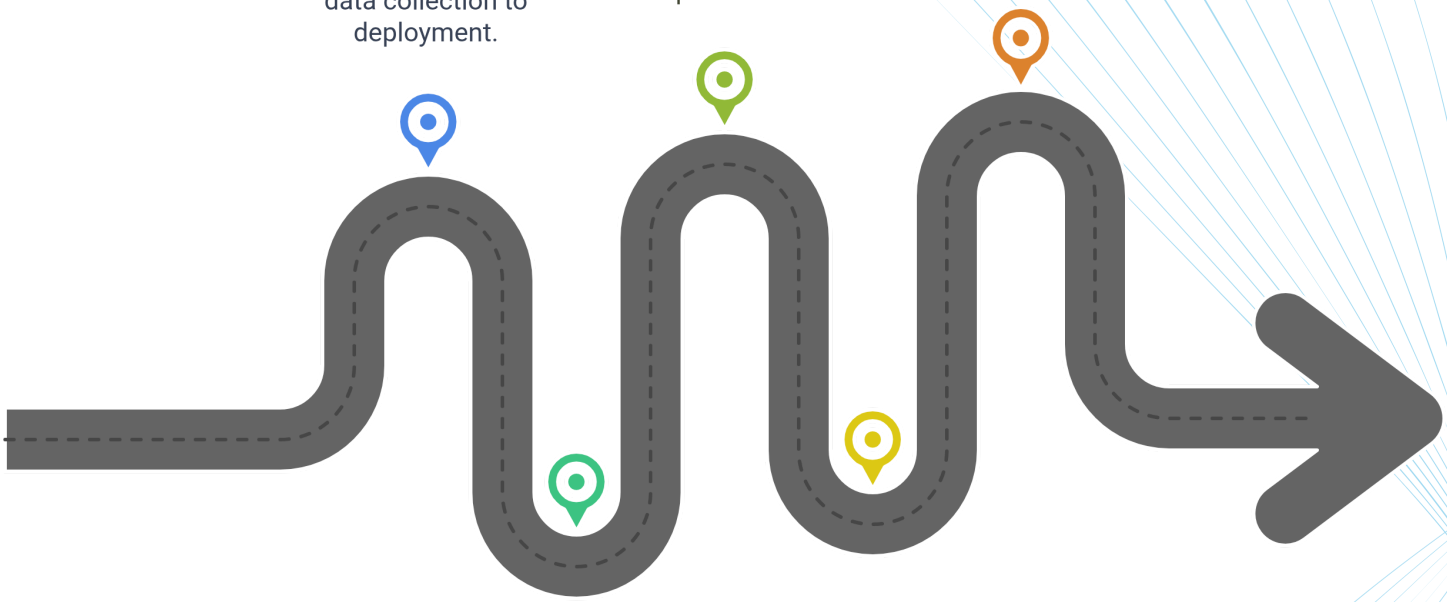
AI Explorer Course – Overview

Level 2 – Intermediate
(24 Classes → 5 Modules)

AI Workflow
Understand the end-to-end AI cycle from data collection to deployment.

Computer Vision
Create projects that detect faces and objects using computer vision.

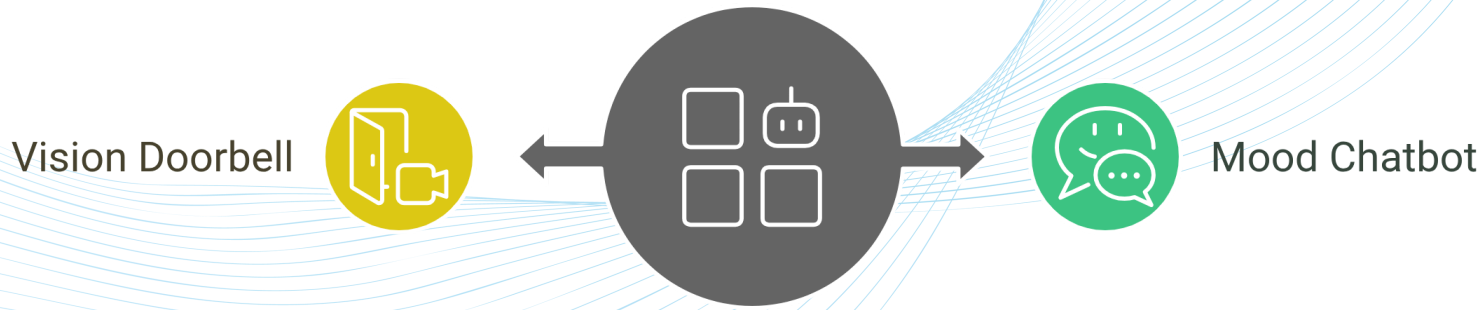
Problem-Solving
Design AI solutions for real-world problems in education and environment.



NLP Skills
Develop chatbots and text analysis tools using NLP techniques.

Data Ethics
Learn about fairness, privacy, and bias in AI systems.

Featured Projects



AI Explorer Course – Overview

Level 3 – Advanced
(24 Classes → 5 Modules)

Real-World AI APIs
Integrate third-party AI APIs into a basic project.

Smart Systems
Design logic-driven AI for automation.

Capstone Project
Present a full AI-powered application.

AI + Web
Embed AI models into websites using web technologies.

AI for Social Good
Develop AI solutions for social issues.

Featured Projects

AI Study Assistant

95%

User satisfaction

Smart Waste Sorter

75%

Recycling center efficiency

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

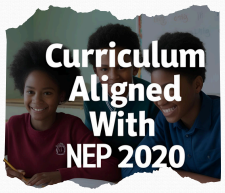
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

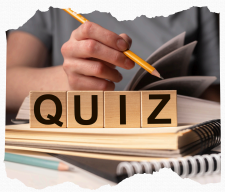
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
