About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Why Should Kids Learn Coding?

Coding Literacy

Essential skill in the digital age

Logical Thinking

Enhances problem-solving abilities

Creativity

Fosters imagination and innovation

Perseverance

Teaches resilience and patience

Future Readiness

Prepares for diverse career paths

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 Project-Based Learning

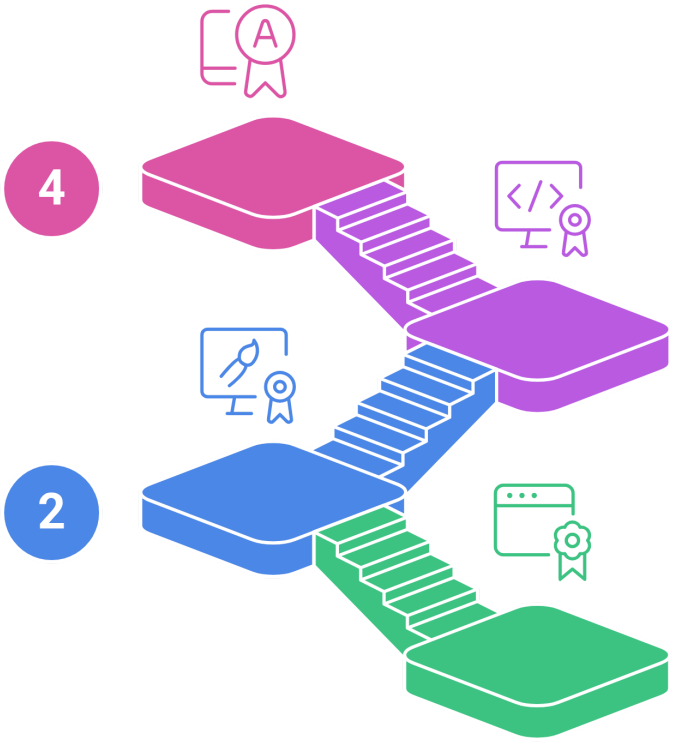
Offers project-based learning in game, app, web development, and more.

Web Wizardry – Overview

A magical course for young creators to learn website building using HTML, CSS & JavaScript. From colorful pages to interactive fun, kids craft real web projects while learning the logic behind the screen. Perfect for turning imaginations into interactive websites!

📚 72 Classes
🎮 15+ Projects
📖 10+ Quizzes

Junior Coders Web Wizardry Certification Path



4 Master Certificate

Hold all three certificates, meet attendance requirements, pass a comprehensive exam, and present a master-level project.

3 Advanced Certificate

Hold the intermediate certificate, complete advanced modules, and develop a capstone web project.

2 Intermediate Certificate

Hold the beginner certificate, complete intermediate modules, and present a multi-page website.

1 Beginner Certificate

Complete beginner modules and a web page project to earn the first certificate.

Key Learnings

- ✅ Learn HTML, CSS & JavaScript basics
- ✅ Design creative web pages & layouts
- ✅ Add interactivity with buttons & logic
- ✅ Build and showcase full web projects

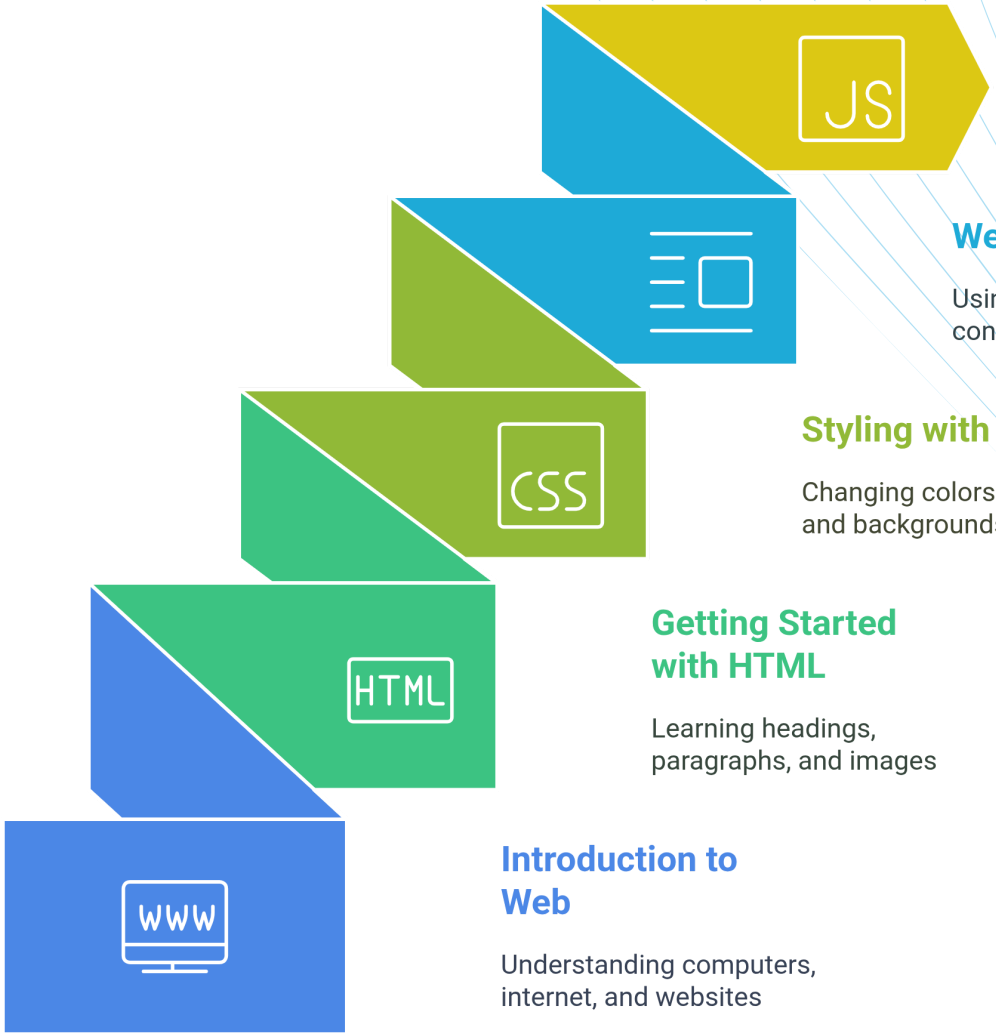
Achievements

- ✅ Create 10+ real-world web pages
- ✅ Earn 4 certificates (Beginner to Master)
- ✅ Complete 5+ hands-on projects
- ✅ Become a certified Junior Web Wizard

Web Wizardry – Overview

Level 1 – Beginner

(24 Classes → 5 Modules)



Simple JavaScript

Adding buttons and interactions

Web Layout Basics

Using divs and arranging content

Styling with CSS

Changing colors, fonts, and backgrounds

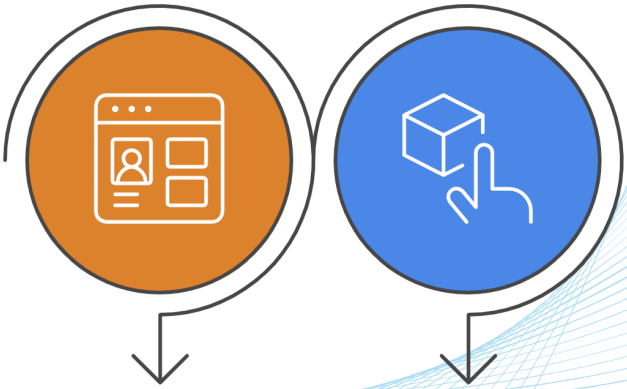
Getting Started with HTML

Learning headings, paragraphs, and images

Introduction to Web

Understanding computers, internet, and websites

Featured Projects



Personal Webpage

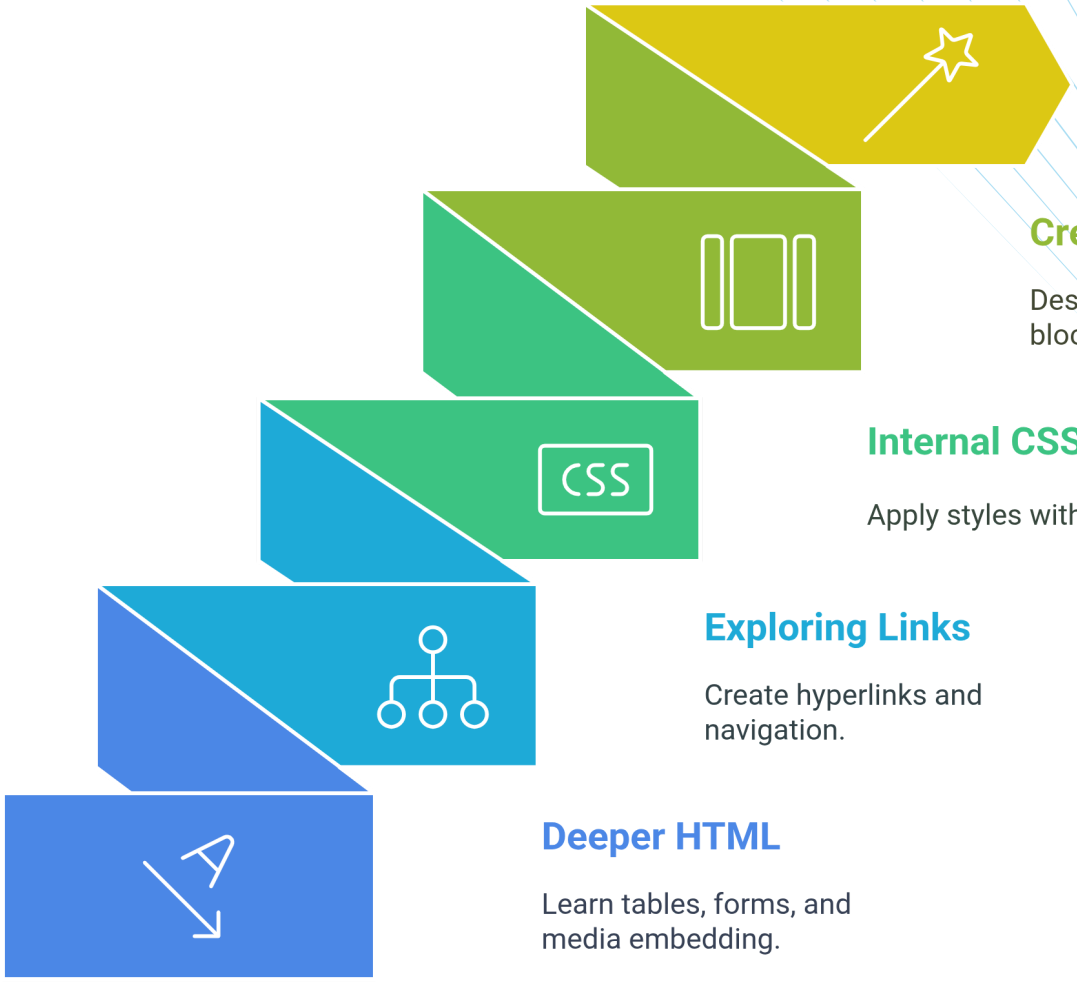
Colorful webpage introducing student and hobbies.

Interactive Page

Interactive page with clickable button and alert.

Web Wizardry – Overview

Level 2 – Intermediate
(24 Classes → 5 Modules)



Fun Interactions

Add interactive elements.

Creative Layouts

Design layouts with blocks.

Internal CSS

Apply styles with CSS.

Exploring Links

Create hyperlinks and navigation.

Deeper HTML

Learn tables, forms, and media embedding.

Featured Projects

Animal Gallery Card

Design a card-based gallery for animals, each featuring an image, name, and a fun fact. Use divs and internal CSS styling, incorporating borders and layout techniques.

Multi-Page Website

Create a multi-page website about a favorite topic, such as cartoons or superheroes. Include internal links, a navigation bar, and image-based page transitions.

Web Wizardry – Overview

Level 3 – Advanced

(24 Classes → 5 Modules)

Final Creative Project

Integrate all learned concepts to create a complete web project.

JavaScript Power

Use JavaScript to change content and add dynamic logic to webpages.

CSS Effects & Animations

Apply hover effects and transitions to enhance webpage interactivity.

Box Model & Containers

Understand how to use margins, padding, and borders to style content.

Web Page Sections

Learn to structure webpages using headers, footers, and sidebars.

Featured Projects

Digital Magazine

Focuses on structured layout and box model techniques for a professional website.

Dynamic Web App

Emphasizes interactivity and JavaScript logic for a dynamic user experience.

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

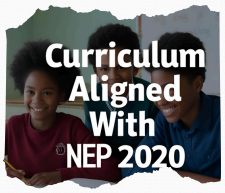
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

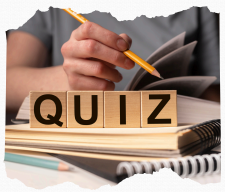
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
