About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Why Should Kids Learn Coding?

Coding Literacy

Essential skill in the digital age

Logical Thinking

Enhances problem-solving abilities

Creativity

Fosters imagination and innovation

Perseverance

Teaches resilience and patience

Future Readiness

Prepares for diverse career paths

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 Project-Based Learning

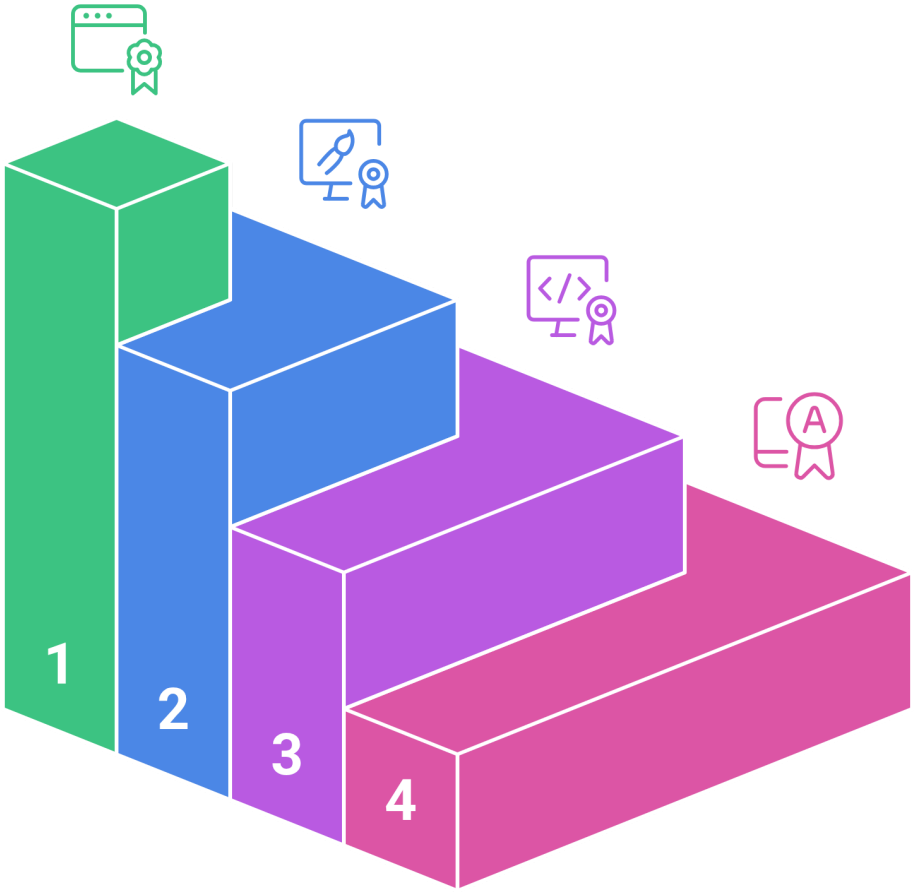
Offers project-based learning in game, app, web development, and more.

Web Wizardry – Overview

A creative coding journey for tweens and teens to explore real-world website development. From layout to logic, they'll learn HTML, CSS & JavaScript by building interactive projects like portfolios, blogs, and dashboards. It's where creativity meets code — and young minds become web builders!

📚 72 Classes
🎮 15+ Projects
📖 10+ Quizzes

Rising Techies Web Wizardry Certification Path



Beginner Certificate

Complete beginner modules and a mini website project.

Intermediate Certificate

Complete intermediate modules and a responsive portfolio website.

Advanced Certificate

Complete advanced modules and a student dashboard web app.

Master Certificate

Meet all requirements and pass the final evaluation.

Key Learnings

- ✅ HTML, CSS, JavaScript mastery
- ✅ Responsive web design
- ✅ Interactivity with DOM & JS
- ✅ Data handling with local storage

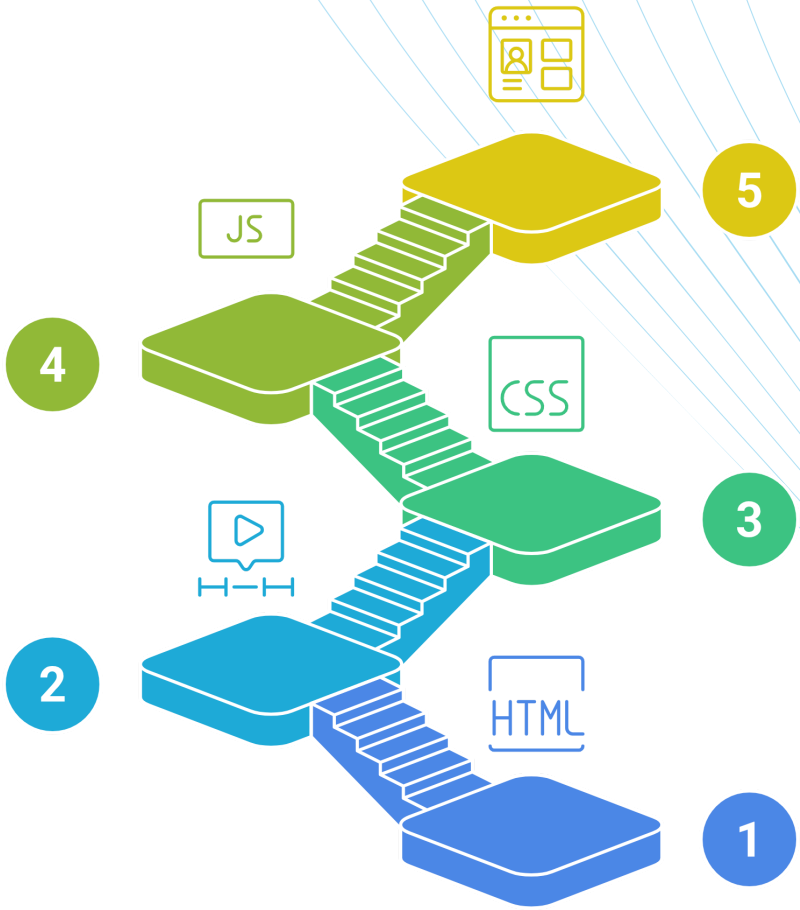
Achievements

- ✅ 10+ real web projects
- ✅ 3 levels + master project
- ✅ 4 pro certificates
- ✅ Become a Rising Techies Web Wizard 🧙‍♂️

Web Wizardry – Overview

Level 1 – Beginner

(24 Classes → 5 Modules)



5 Mini Personal Website

Combine HTML, CSS, and JavaScript to create a personal website.

4 Meet JavaScript

Introduce JavaScript to add interactivity to web pages.

3 Introduction to CSS

Apply CSS to style web pages with consistent design.

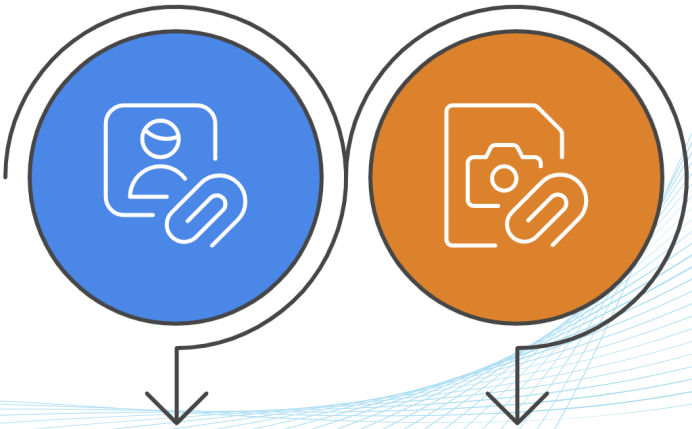
2 Forms and Media

Integrate forms and media elements into web pages.

1 HTML Foundations

Learn basic HTML elements to structure a web page.

Featured Projects



Portfolio Page

Personal page with greeting button.

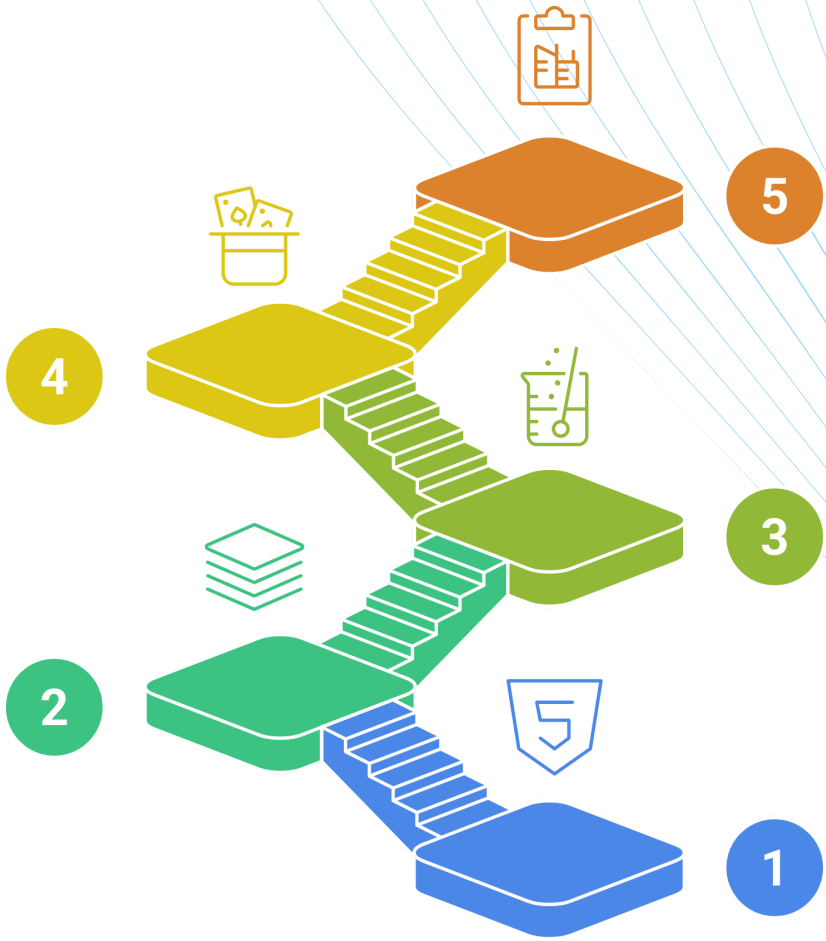
Interactive Webpage

Interactive page with feedback form.

Web Wizardry – Overview

Level 2 – Intermediate

(24 Classes → 5 Modules)



5 Responsive Portfolio Project

Integrate all skills to create a portfolio.

4 DOM Manipulation

Manipulate web elements dynamically.

3 JavaScript Basics

Understand JS functions and operations.

2 CSS Classes and Box Model

Master CSS for layout and spacing control.

1 Deep Dive into HTML5

Learn semantic tags to structure content effectively.

Featured Projects

Responsive Blog Website

Build a blog-style website with semantic HTML and styled sections, including a feedback form. Use JavaScript for a mini calculator performing basic math.

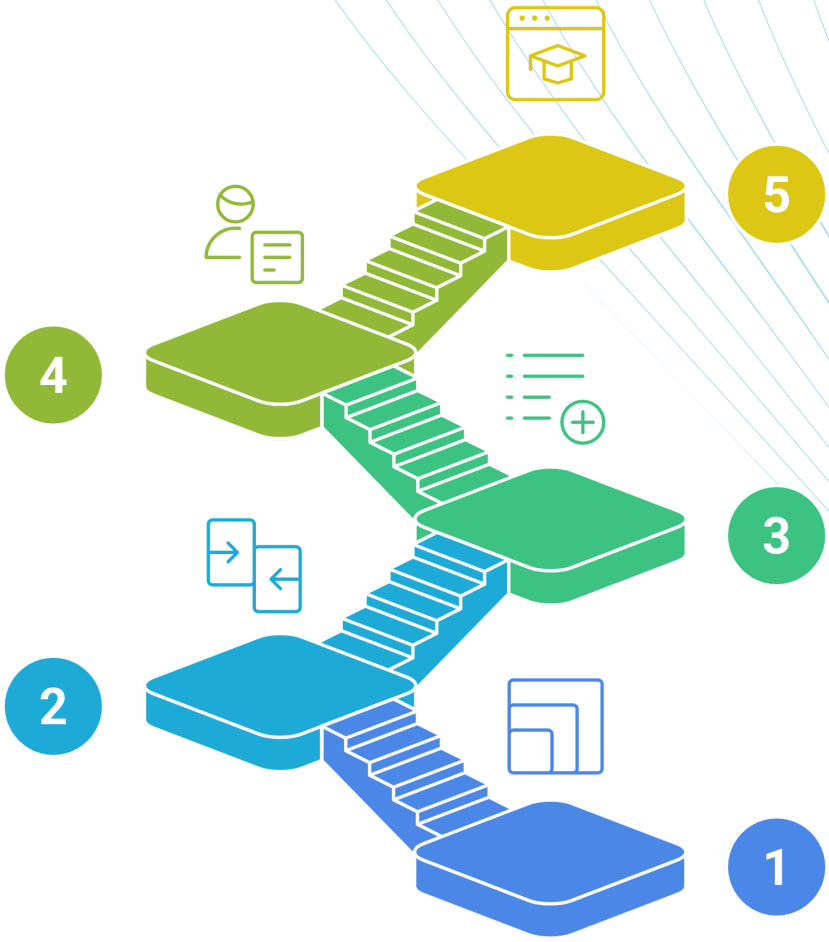
Interactive Quiz Page

Develop an interactive quiz page with hidden questions revealed on click. Instantly display user answers using DOM manipulation within a personal site.

Web Wizardry – Overview

Level 3 – Advanced

(24 Classes → 5 Modules)



5 Real-World Project

Apply all learned skills to build a functional web application.

4 Local Storage

Implement local storage to save and retrieve user data.

3 Advanced JavaScript

Understand advanced JavaScript concepts for dynamic web elements.

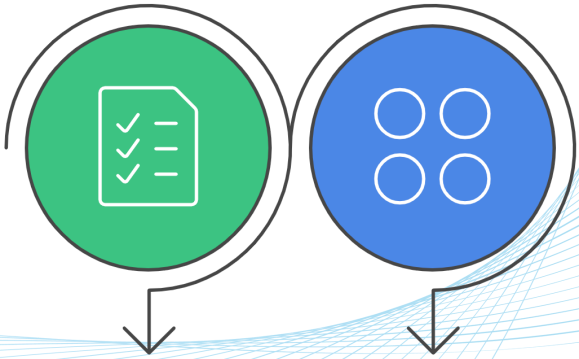
2 CSS Transitions

Master CSS transitions and effects for interactive UI.

1 Flexbox Layouts

Learn to create responsive layouts using flexbox.

Featured Projects



To-do list app

Dynamic to-do list with local storage

Student Dashboard

Functional student dashboard with progress tracking

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

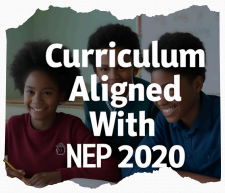
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

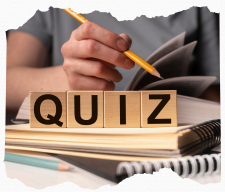
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
