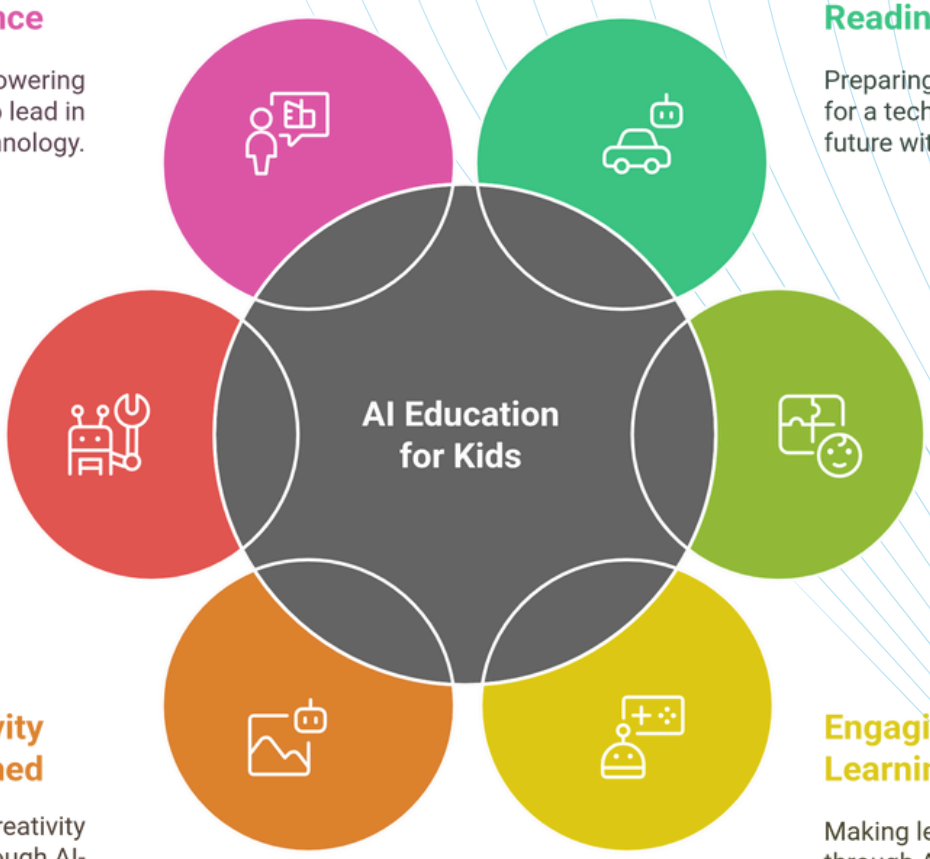
About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Benefits of AI Education for Kids



Leadership Confidence

Empowering children to lead in technology.

Future Readiness

Preparing children for a tech-driven future with AI skills.

Practical Skills

Equipping children with real-world tech skills.

Logical Thinking

Enhancing problem-solving and decision-making abilities.

Creativity Unleashed

Fostering creativity through AI-generated art and music.

Engaging Learning

Making learning fun through AI-powered games and projects.

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 — NEP 2020 Alignment
Expertly designed curriculum aligned with NEP 2020 guidelines.

2 — BIDE Model
Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 — STEAM Integration
Integrates Science, Technology, Engineering, Arts, and Math concepts.

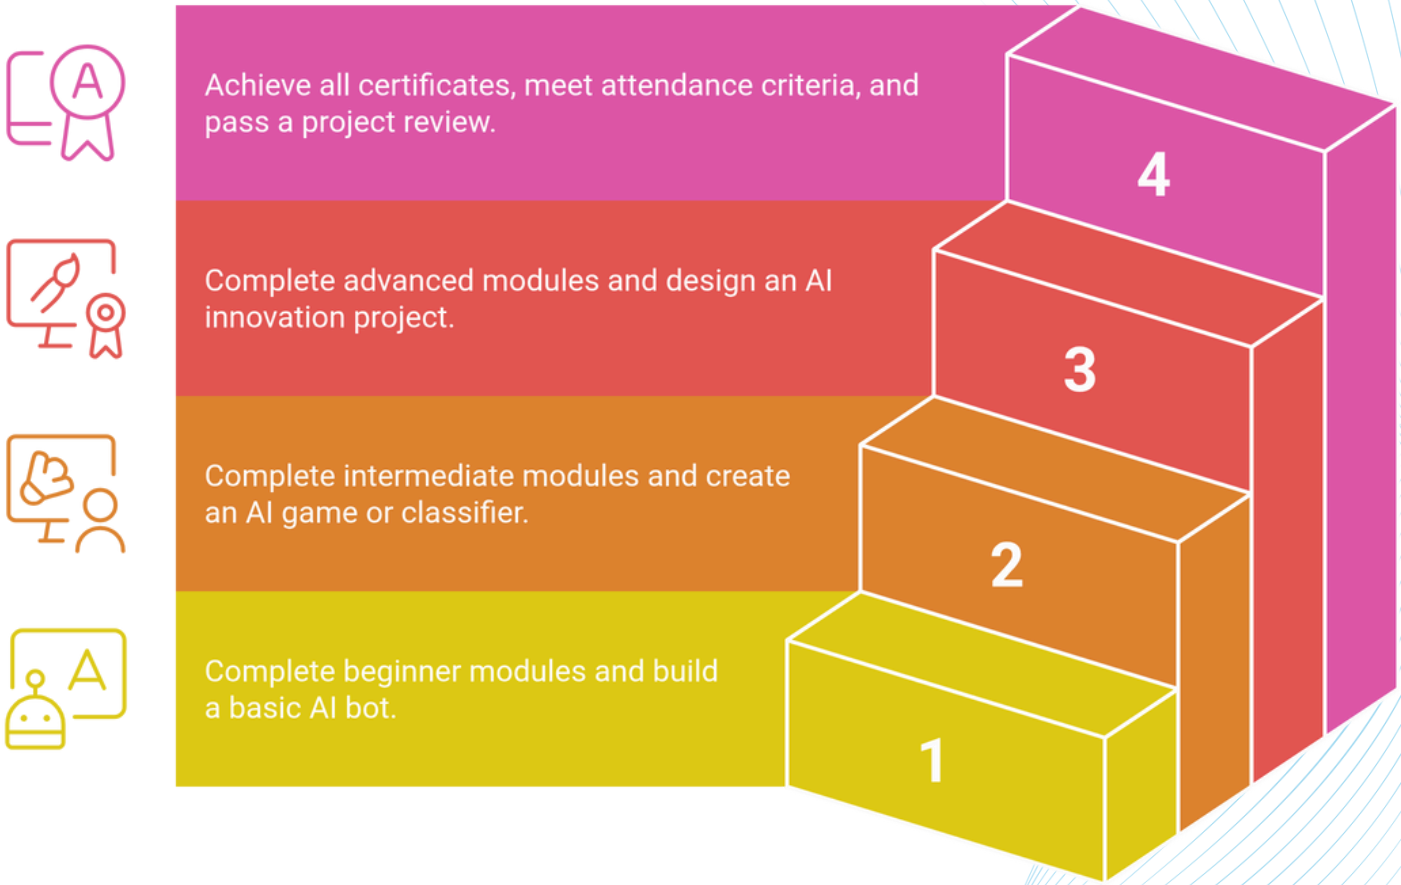
4 — Project-Based Learning
Offers project-based learning in game, app, web development, and more.

AI Explorer Course – Overview

A perfect course for kids to enter the world of Artificial Intelligence with fun, hands-on activities. From chatbots to image recognition, kids learn how smart machines think, see, and talk—using playful tools, games, and real-life AI examples.

📚 72+ Classes
🎮 5+ Projects
📖 10+ Quizzes

Junior Coders - AI Explorer Certification Path



Key Learnings

- ✅ Learn how AI works.
- ✅ Explore AI's sight and sound.
- ✅ Build chatbots and games.
- ✅ Train AI to recognize and decide.

Achievements

- ✅ Create a chatbot.
- ✅ Build AI-based games.
- ✅ Design an AI helper.
- ✅ Complete and present an AI project.

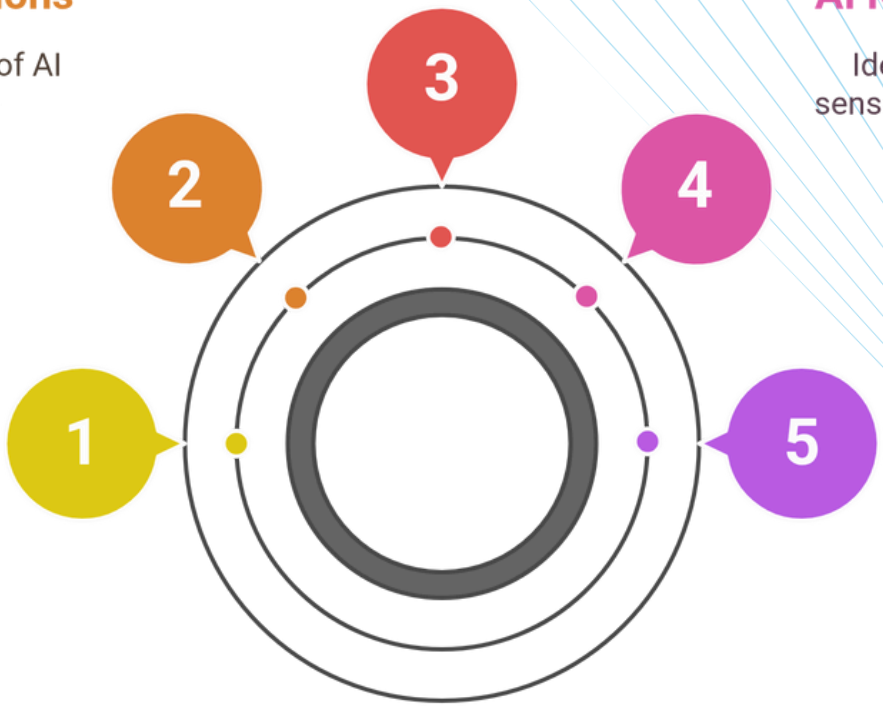
AI Explorer Course – Overview

Level 1 – Beginner
(24 Classes → 5 Modules)

AI Creation
Building simple AI tools

AI Applications
Practical uses of AI in daily life

AI Recognition
Identifying AI's sensory capabilities



AI Understanding
Core knowledge of AI principles

AI Basics
Foundational concepts of AI

Featured Projects

1

Create a chatbot using Scratch or Teachable Machine that greets the user and answers simple questions.

Talking chatbot

2

Build a fun AI game where the machine can recognize pictures of animals or fruits and sort them correctly.

AI game

AI Explorer Course – Overview

Level 2 – Intermediate
(24 Classes → 5 Modules)

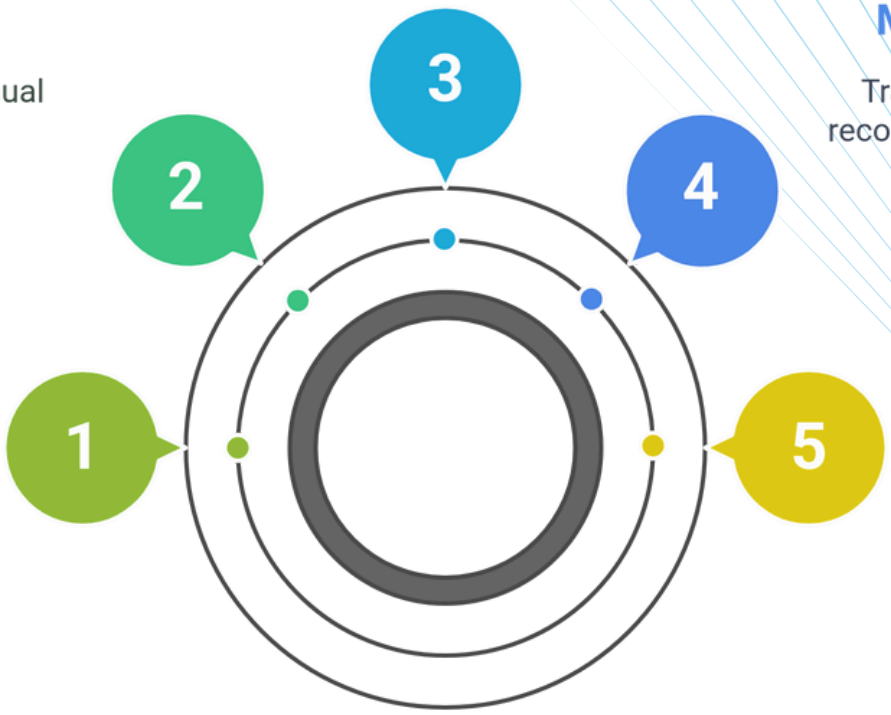
Voice & Sound AI
Build voice-detecting activity

Visual AI Games
Apply AI in visual games

Teach the Machine
Train model to recognize gestures

Mini AI Showcase
Present working AI model

Smart Choices
Understand AI decision-making



Featured Projects

Quiz Game AI

Design a quiz game where AI judges answers using logic flows.

Teachable Machine Fun

Train AI to recognize gestures, respond with actions.

AI Explorer Course – Overview

Level 3 – Advanced
(24 Classes → 5 Modules)

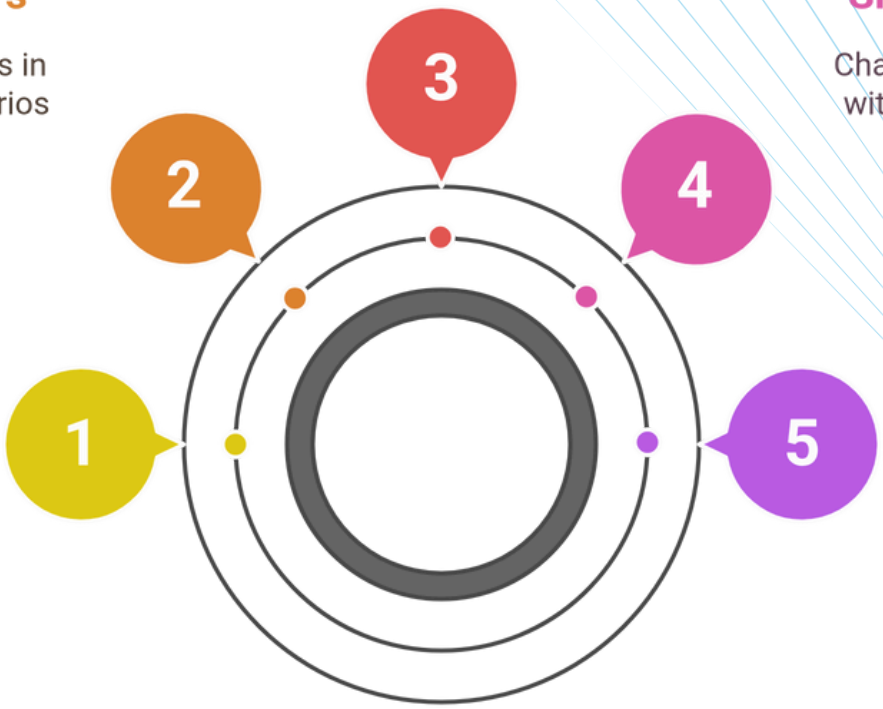
AI Learning
Understanding AI feedback mechanisms

AI Helpers
AI applications in various scenarios

Smart Bots
Chatbot creation with conditions

Final Project
Creative AI project by students

Creative AI Tools
Exploring AI art and music



Featured Projects

1 — AI Art Creation
Use AI to generate art and present it.

2 — AI Chatbot Creation
Build a chatbot to solve problems and answer questions.

Made with Napkin

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

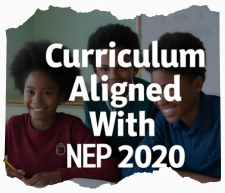
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

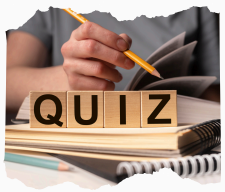
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

"My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!"

Aarav Jain
Student

"I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next."

Rakesh Verma
Parent

"The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!"

Kavya Mishra
Student

"I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!"
