About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Why Should Kids Learn Coding?

Coding Literacy

Essential skill in the digital age

Logical Thinking

Enhances problem-solving abilities

Creativity

Fosters imagination and innovation

Perseverance

Teaches resilience and patience

Future Readiness

Prepares for diverse career paths

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 Project-Based Learning

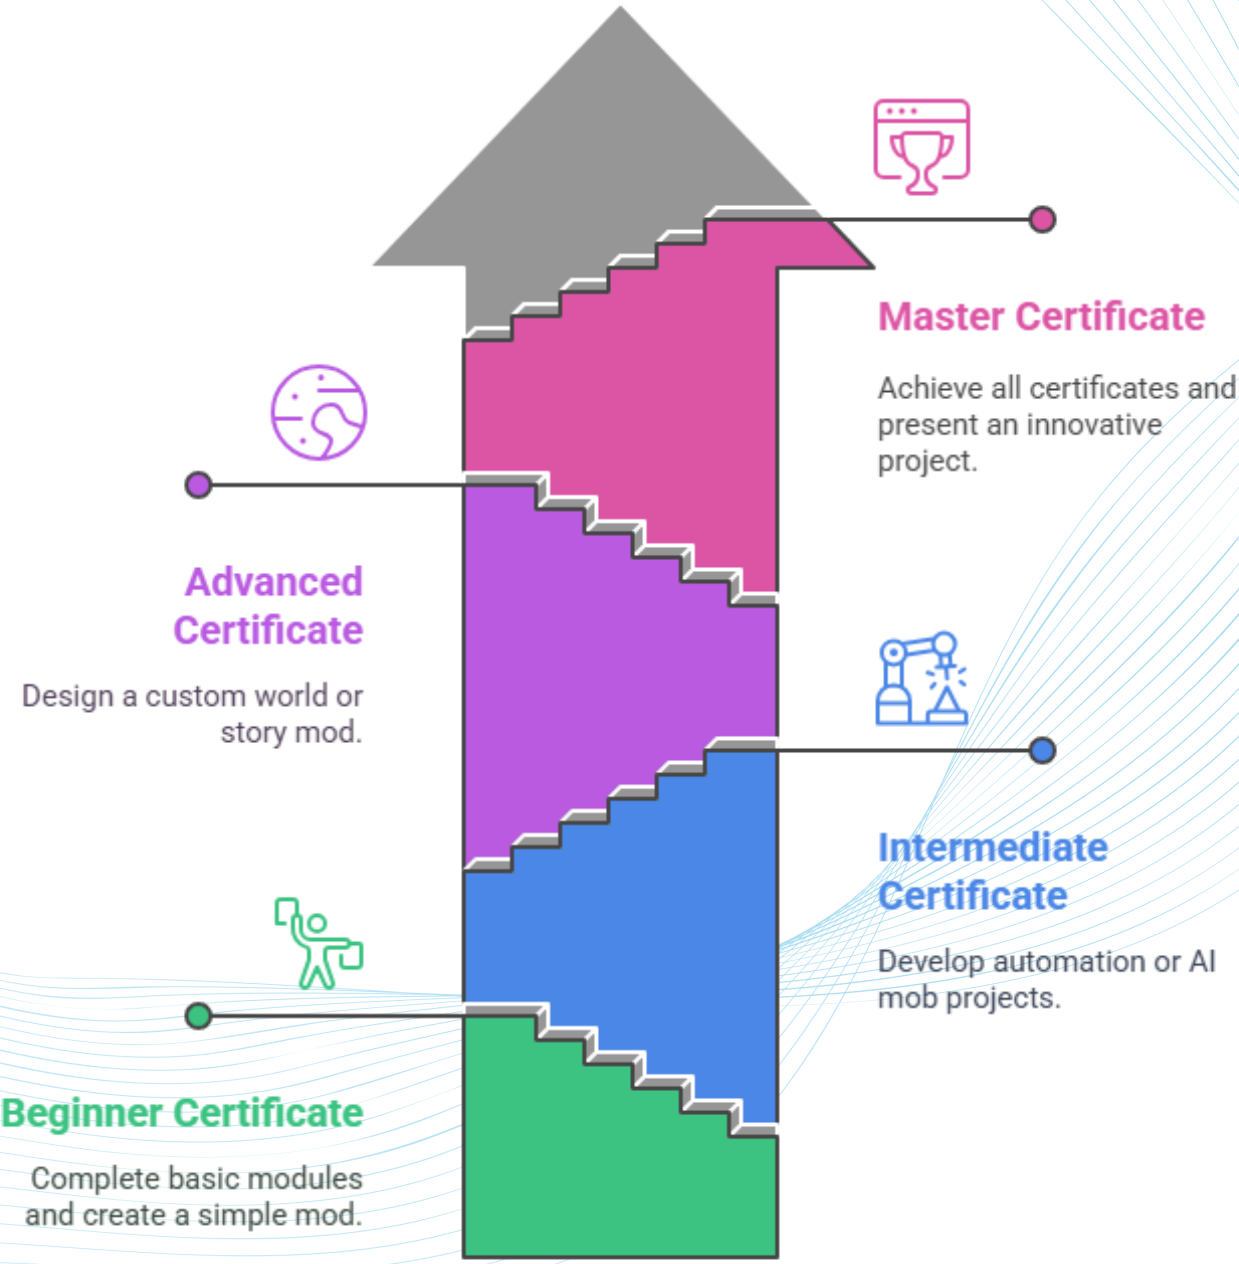
Offers project-based learning in game, app, web development, and more.

Minecraft - Overview

Give your child a head start in tech with Rising Techie – Minecraft Coding. Designed for young creators, this course builds strong problem-solving and creative thinking skills through hands-on Minecraft modding. Students will design their own worlds, build custom blocks, and bring ideas to life through coding — all while having fun. A perfect first step into game development and innovation, helping kids prepare for a future where creativity and technology go hand in hand.

📚 72 Classes
🎮 10+ Projects
📖 8+ Quizzes

Minecraft Rising Techies Certification Path



Minecraft - Overview

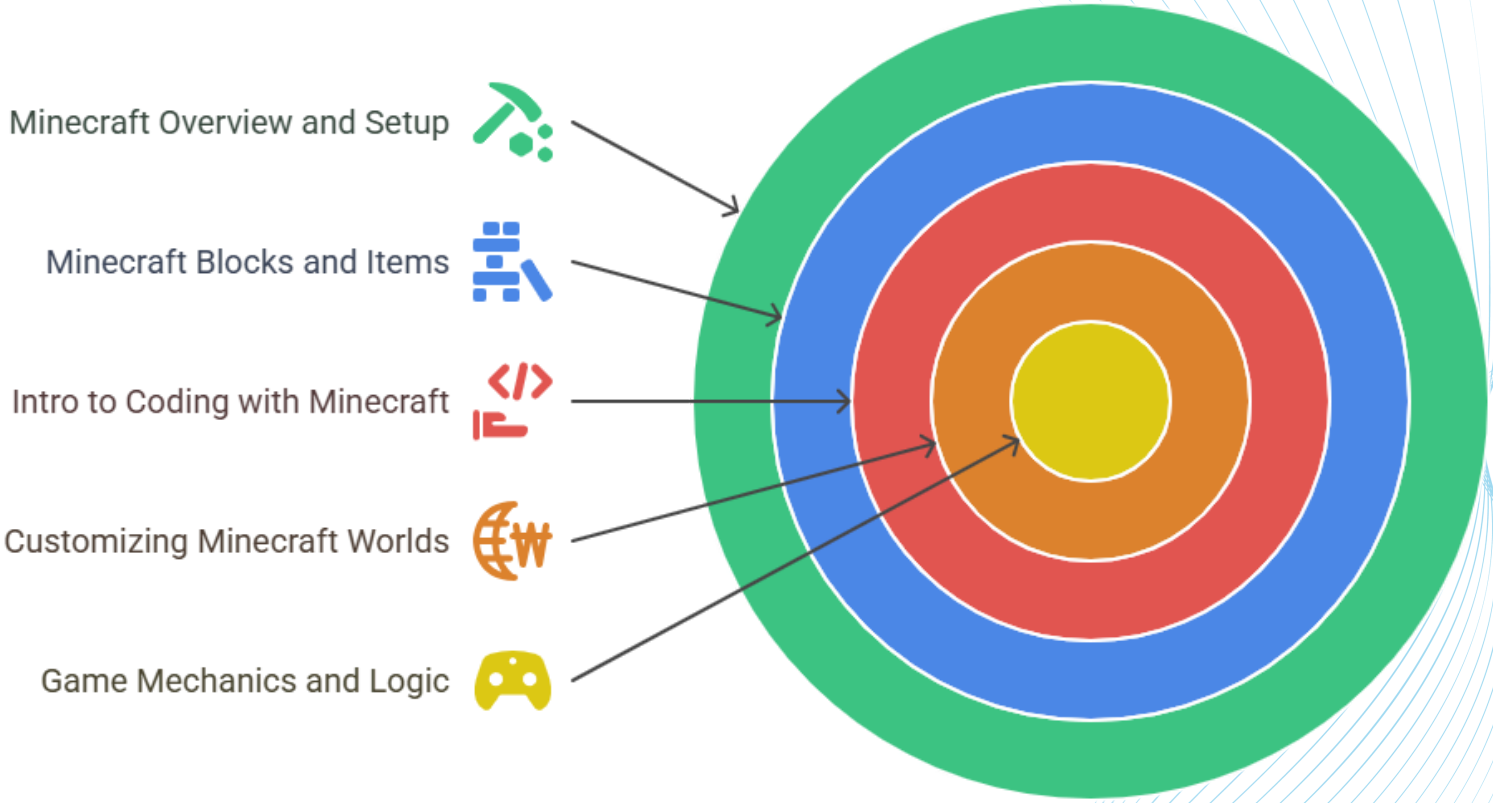
Key Learnings

- ✅ Learn Minecraft modding from scratch
- ✅ Code custom items, mobs & worlds
- ✅ Build multiplayer & AI-based mods
- ✅ Master game logic, optimization & updates

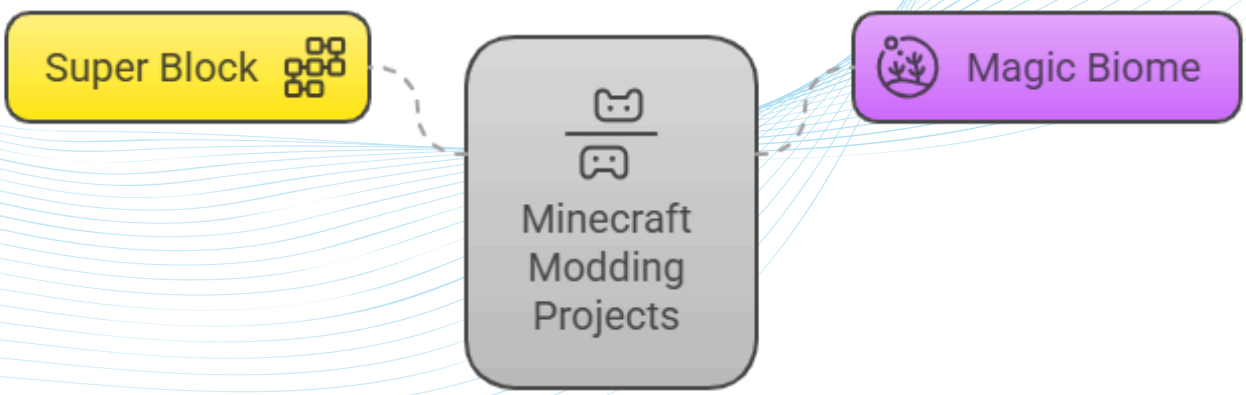
Achievements

- ✅ 15+ custom Minecraft mods built
- ✅ Hosted own modded Minecraft server
- ✅ Created educational & story-based mods
- ✅ Presented a capstone mod project

Level 1 – Beginner (24 Classes → 5 Modules)



Featured Projects



Minecraft - Overview

Level 2 – Intermediate (24 Classes → 5 Modules)

Server Management

Manage servers with custom mods

Multiplayer Mods

Develop mods for multiplayer servers

AI and Pathfinding

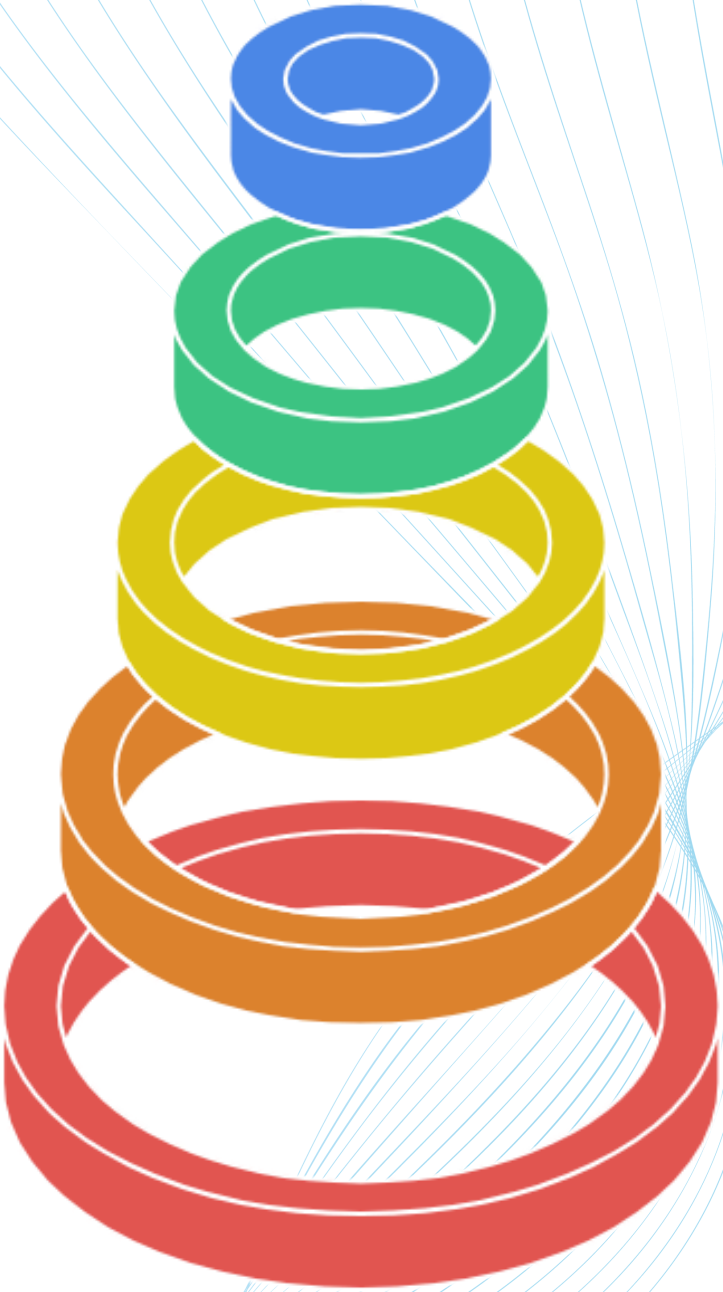
Create AI for dynamic mob interactions

Advanced Coding

Dive into Java for complex mods

Redstone Automation

Use redstone for advanced automation



Featured Projects

Create Your Own AI Pet

Code a custom mob or NPC that interacts with players

Redstone Adventure Challenge

Build an adventure map with Redstone circuits and command blocks

Minecraft - Overview

Level 3 – Advanced (24 Classes → 5 Modules)

Capstone Project

Demonstrates mastery of modding skills

Future-Proofing Mods

Ensures compatibility with updates

Optimization

Improves game performance

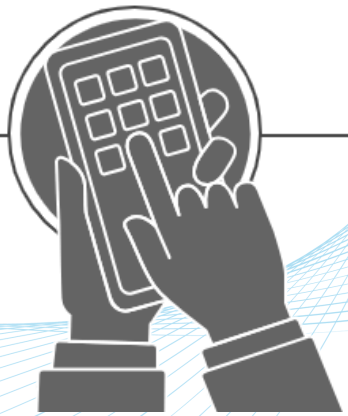
Storytelling Mods

Creates narratives and experiences

Educational Mods

Teaches concepts through gameplay

Featured Projects



Educational Quiz

Create a mod with quiz questions.

Interactive Story

Build an adventure map with choices.

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

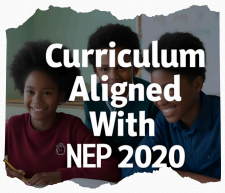
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

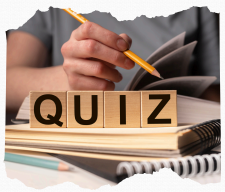
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
