About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Why Should Kids Learn Coding?

Coding Literacy

Essential skill in the digital age

Logical Thinking

Enhances problem-solving abilities

Creativity

Fosters imagination and innovation

Perseverance

Teaches resilience and patience

Future Readiness

Prepares for diverse career paths

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 Project-Based Learning

Offers project-based learning in game, app, web development, and more.

Python - overview

Tailored for curious teens, this course dives deeper into real-world Python applications. Students sharpen their logic, automate tasks, and build mini software projects using structured code. From creating games to analyzing data, learners apply coding to solve real challenges. A powerful next step for young innovators ready to take their Python skills to the next level and prepare for careers in tech, AI, and beyond.

📚 72 Classes
🎮 15+ Projects
📖 8+ Quizzes

Python Rising Techies Certification Path

Master Certificate

Hold Advanced Certificate and complete Master Challenge Projects

Advanced Level Certificate

Hold Intermediate Certificate and design an advanced Python project

Intermediate Level Certificate

Hold Beginner Certificate and create a fun Python game

Beginner Level Certificate

Complete beginner modules and build a basic Python program

Python - overview

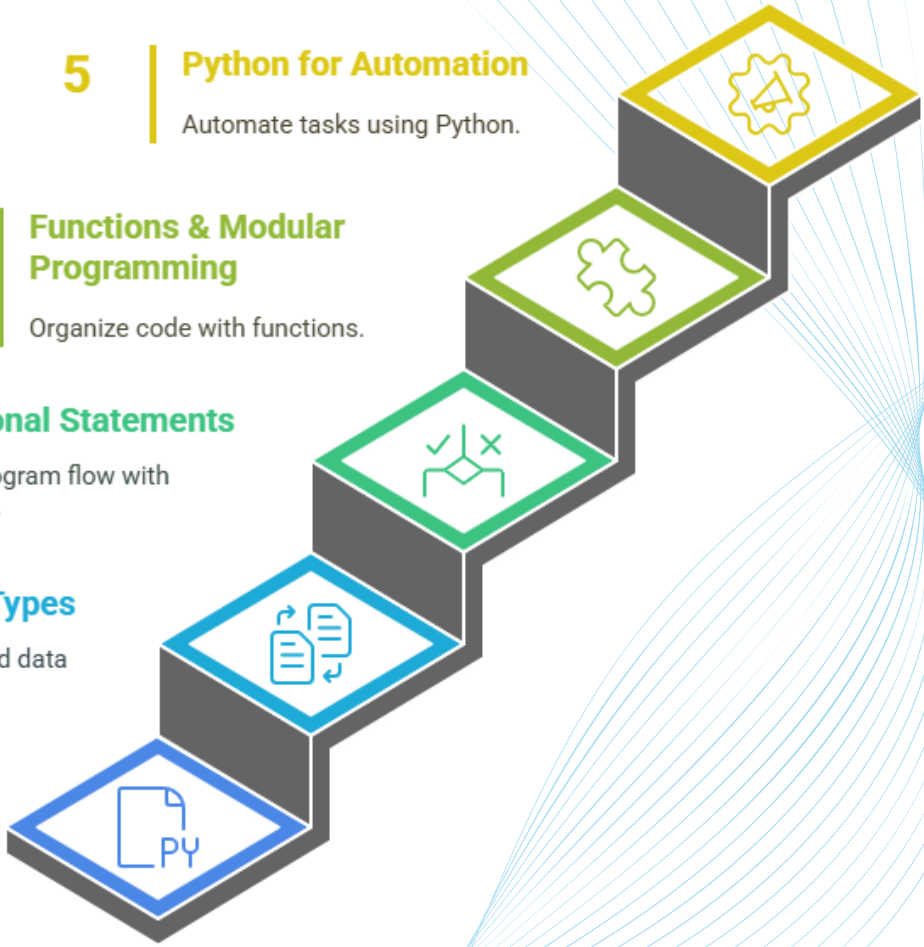
Key Learnings

- ✅ Write Python code with logic & structure
- ✅ Use data structures, OOP & libraries
- ✅ Build apps, games & automation scripts
- ✅ Explore web, APIs & data science basics

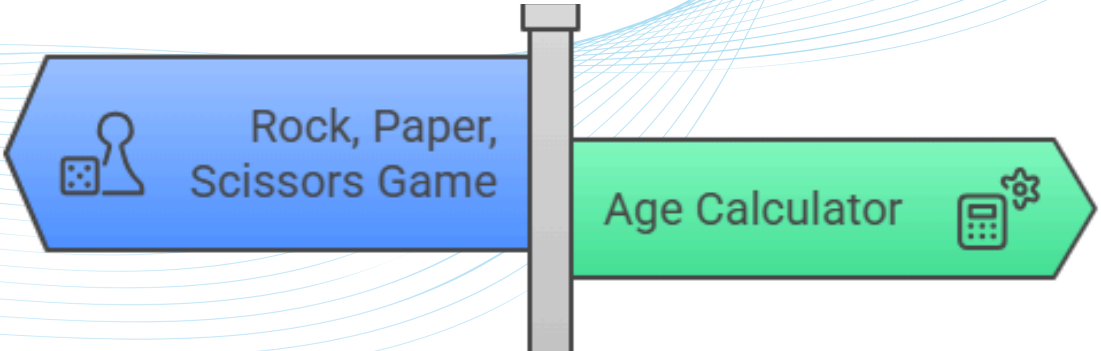
Achievements

- ✅ Made 15+ real Python programs
- ✅ Built a game & web app
- ✅ Automated real-life tasks
- ✅ Delivered a final full project

Level 1 – Beginner
(24 Classes → 5 Modules)

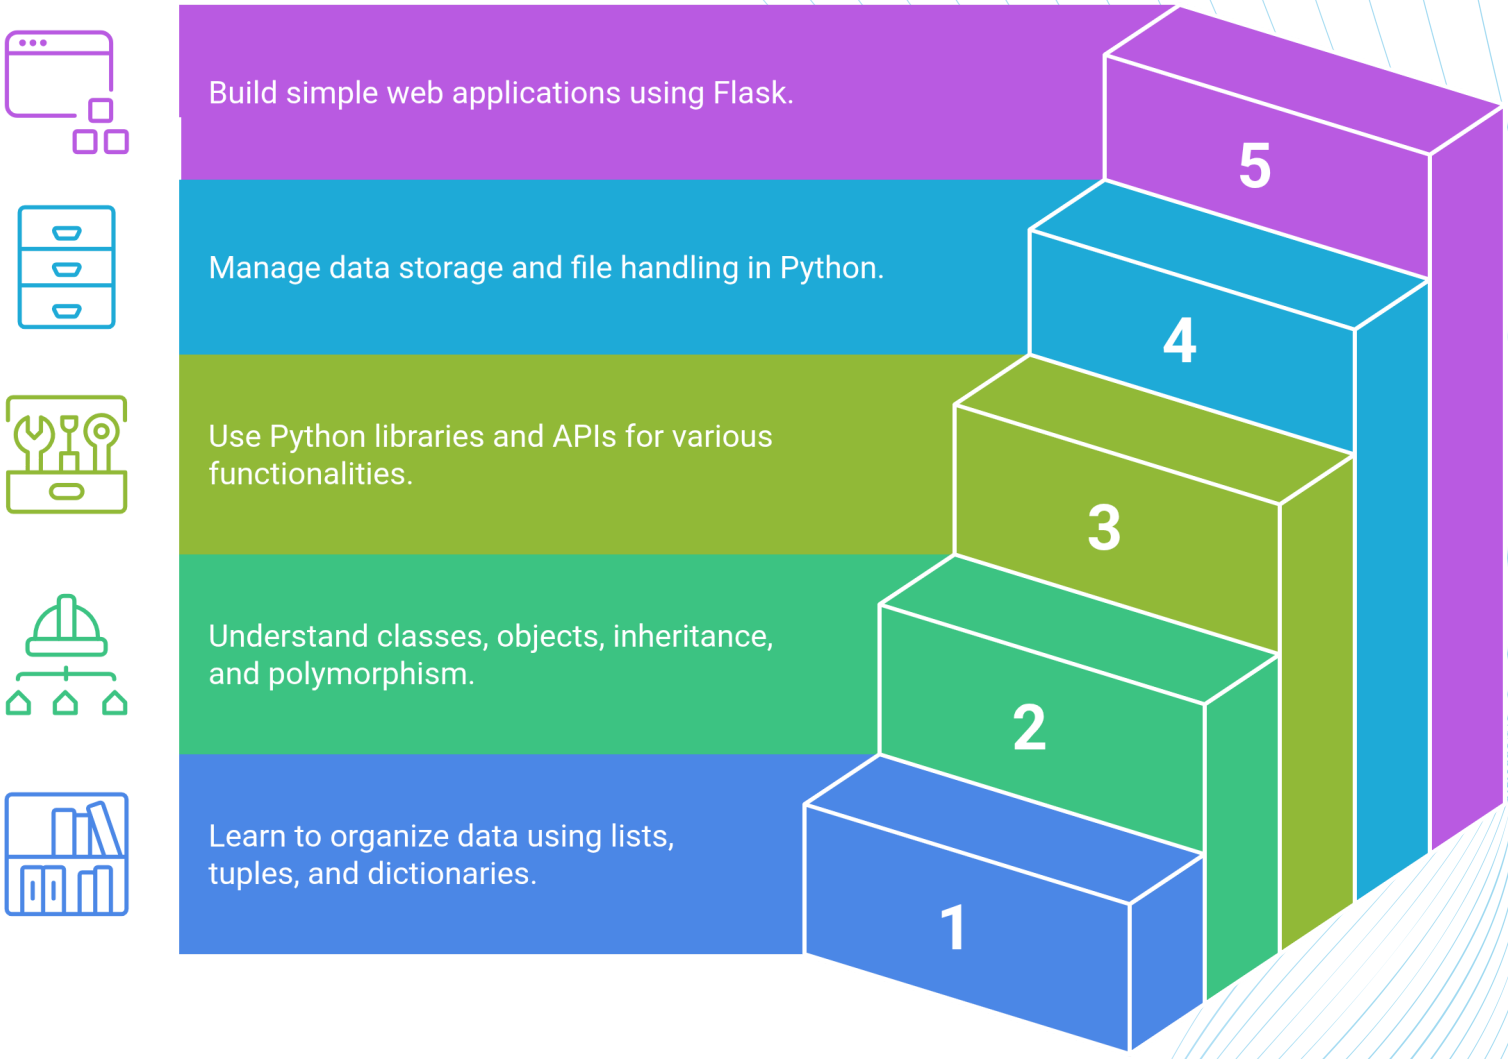


Featured Projects



Python - overview

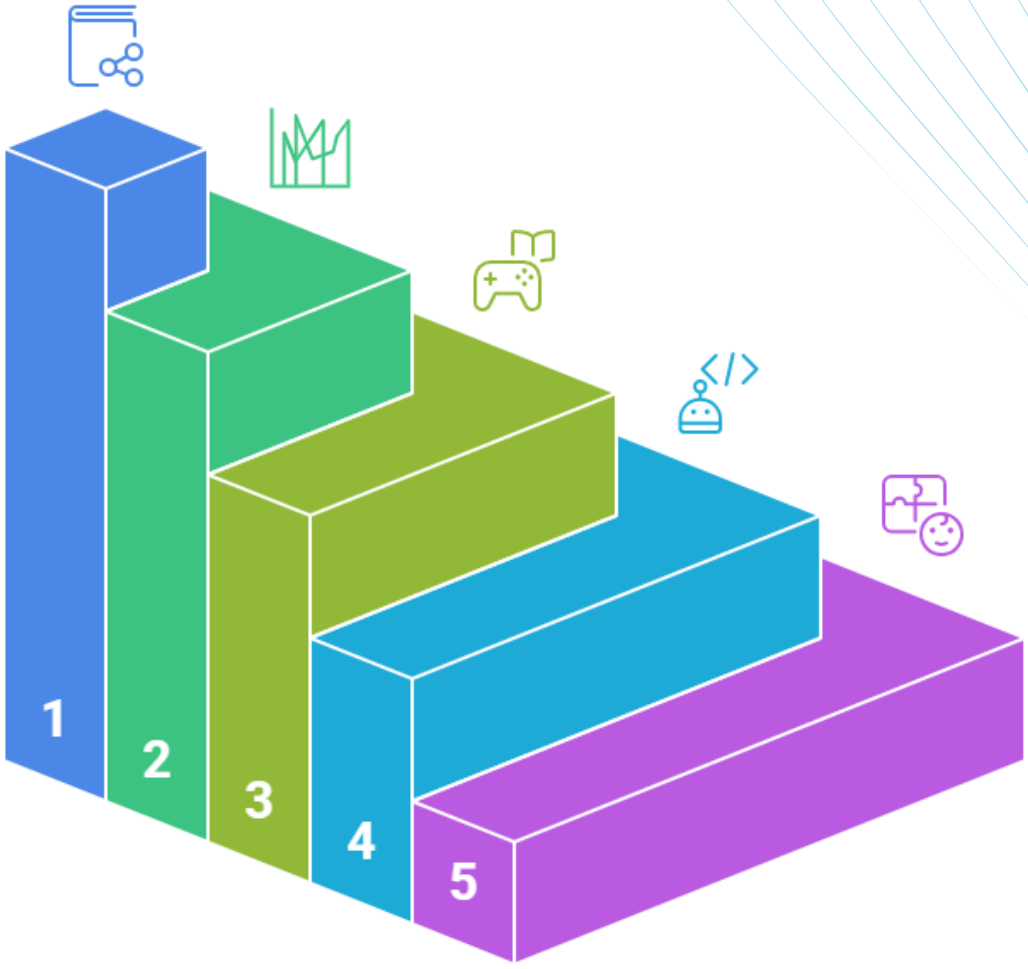
Level 2 – Intermediate (24 Classes → 5 Modules)



Featured Projects

Python - overview

Level 3 – Advanced (24 Classes → 5 Modules)



Advanced Data Structures

Learn to implement stacks, queues, and linked lists for complex problem-solving.

Data Science with Python

Explore data analysis and visualization using pandas and matplotlib.

Building Games with Python

Develop a simple 2D game using the pygame library.

Automation and Scripting

Master scripting techniques to automate daily tasks and workflows.

Capstone Project

Design and present a functional Python application, showcasing learned skills.

Featured Projects

Project 1

Data Insights Dashboard

Project 2

2D Adventure Game

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

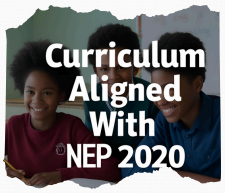
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

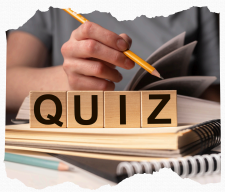
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
