About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

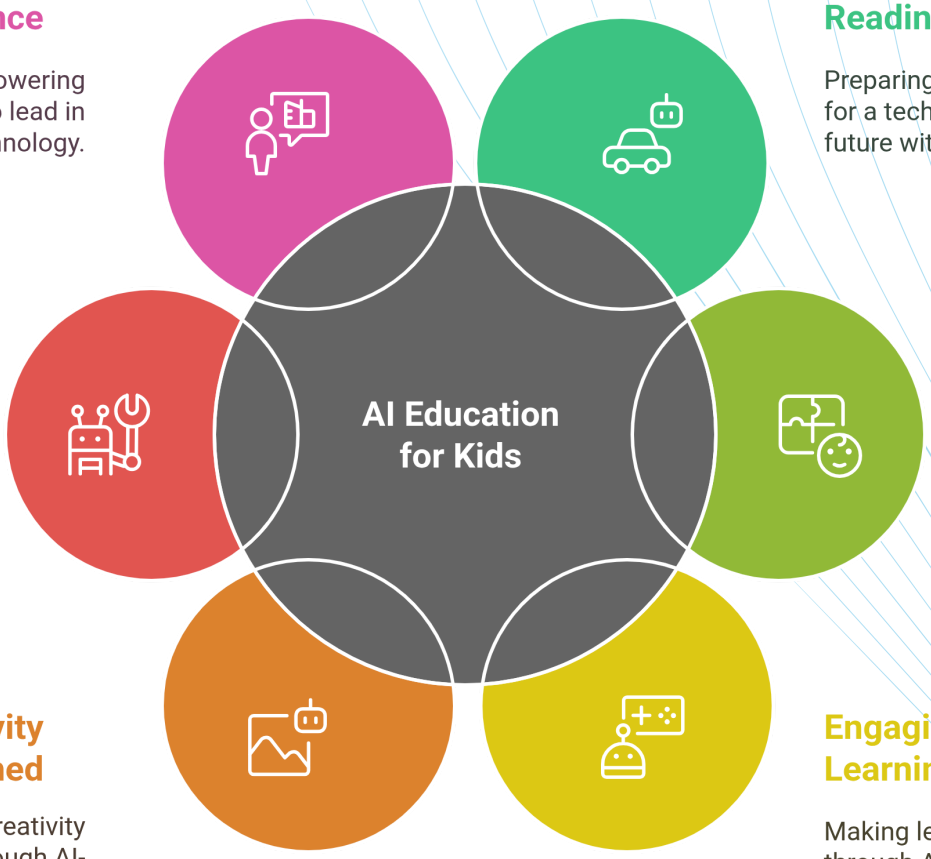
Benefits of AI Education for Kids

Leadership Confidence

Empowering children to lead in technology.

Future Readiness

Preparing children for a tech-driven future with AI skills.



Practical Skills

Equipping children with real-world tech skills.

Logical Thinking

Enhancing problem-solving and decision-making abilities.

Creativity Unleashed

Fostering creativity through AI-generated art and music.

Engaging Learning

Making learning fun through AI-powered games and projects.

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 — NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 — BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 — STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 — Project-Based Learning

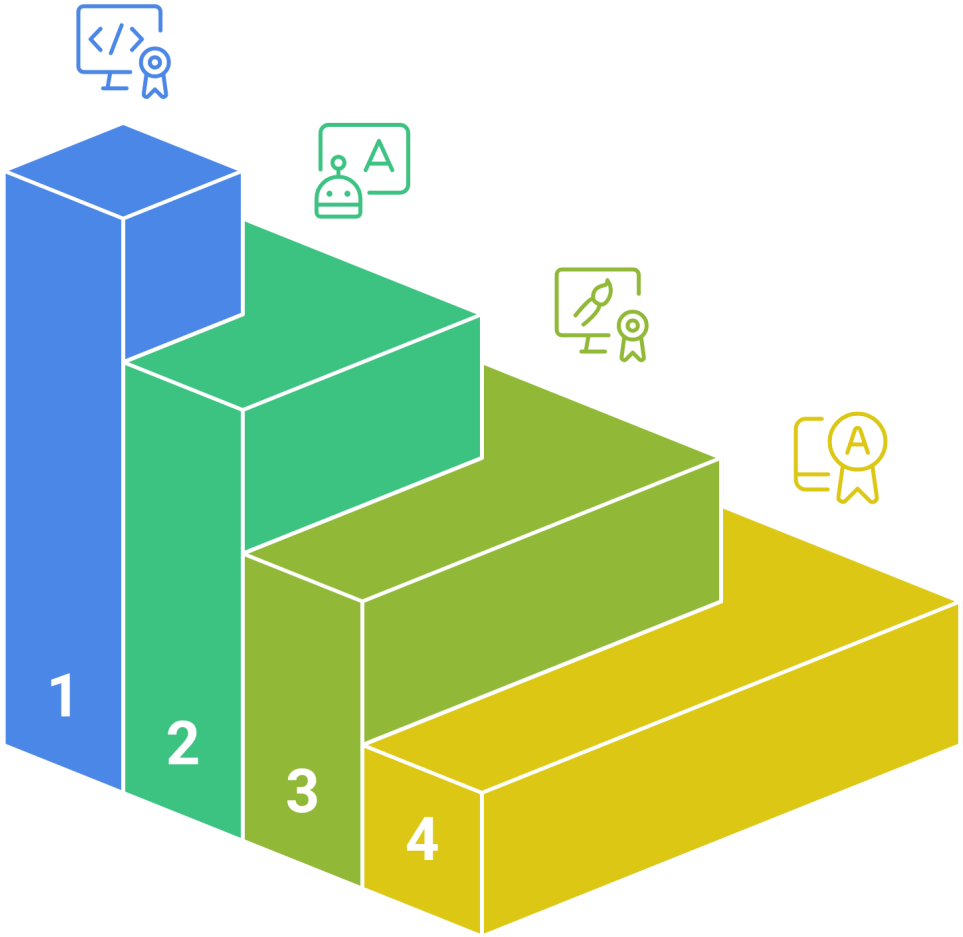
Offers project-based learning in game, app, web development, and more.

AI Explorer Course – Overview

Step into the future with AI! This course is perfect for curious minds who want to explore how smart machines work. From training models and building chatbots to understanding data and creating real-life AI projects—kids will learn to think like innovators and build the tech of tomorrow

72+ Classes
5+ Projects
10+ Quizzes

Rising Techies - AI Explorer Certification Path



Beginner Certificate

Complete foundation modules and build a basic AI project.

Intermediate Certificate

Complete builder modules and create an AI chatbot or game.

Advanced Certificate

Complete advanced modules and design an AI web innovation project.

Master Certificate

Meet all requirements and present a creative AI project to earn the highest certification.

Key Learnings

- ✅ Basics of AI & how it learns
- ✅ Build projects with voice, vision & data
- ✅ Explore NLP, ethics & real-world AI
- ✅ Web + AI integration made easy

Achievements

- ✅ Trained models & made predictions
- ✅ Built chatbots & interactive tools
- ✅ Created AI-powered websites
- ✅ Final capstone solving real problems

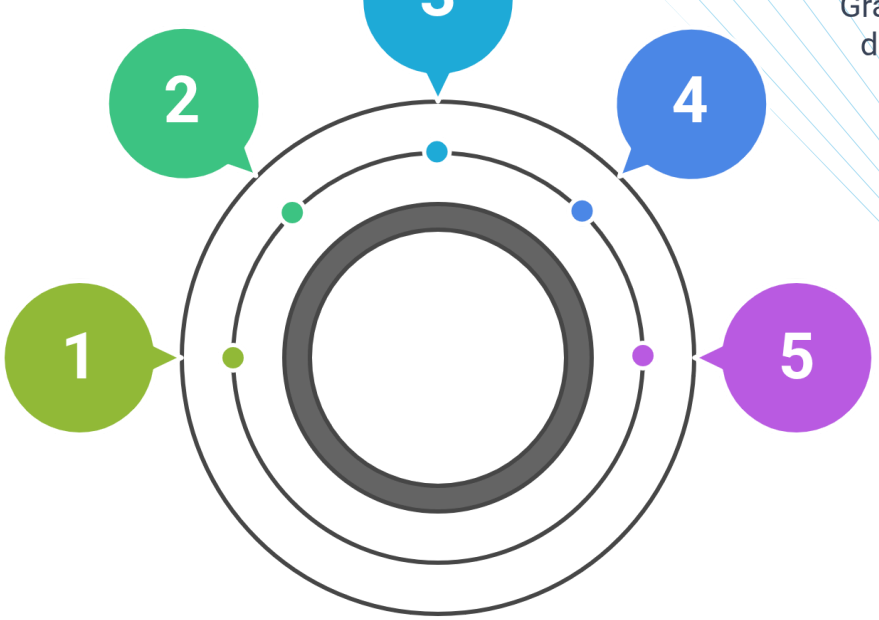
AI Explorer Course – Overview

Level 1 – Beginner
(24 Classes → 5 Modules)

Smart Predictions
Explain AI's predictive capabilities

Model Training
Train models for recognition

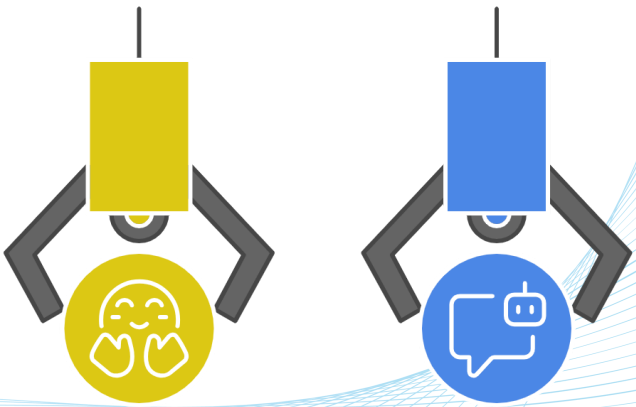
Data Understanding
Grasp AI's data dependency



AI Project
Create a working AI prototype

AI Introduction
Define AI and its applications

Featured Projects



AI Mood Reader
Detect mood and change animation.

Emoji Predictor
Suggest emojis based on sentence type.

AI Explorer Course – Overview

Level 2 – Intermediate
(24 Classes → 5 Modules)

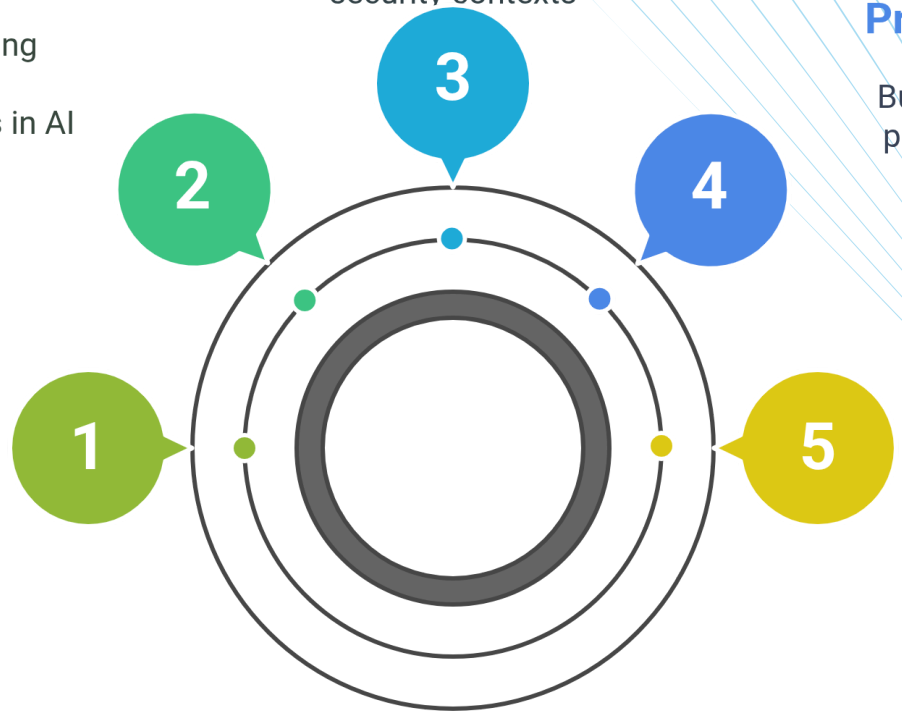
1 – AI Explorer Mini Hackathon
Culminating project for practical application

2 – Ethics in AI
Understanding ethical considerations in AI

3 – AI in Games and Security
Applying AI in interactive and security contexts

4 – Natural Language Processing
Building NLP projects like chatbots

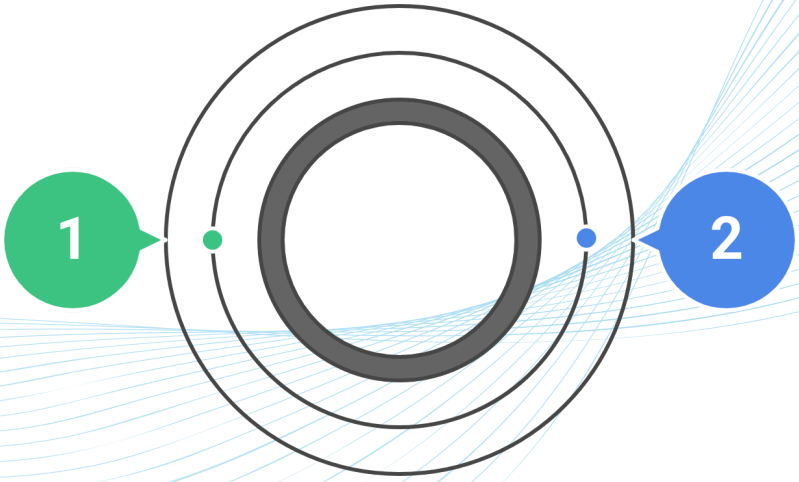
5 – How Machines Learn
Describing learning models with examples



Featured Projects

1 – AI Spy Game
Camera-based detection game

2 – Smart Chat Buddy
NLP-powered chatbot



AI Explorer Course – Overview

Level 3 – Advanced
(24 Classes → 5 Modules)

Voice AI and Commands

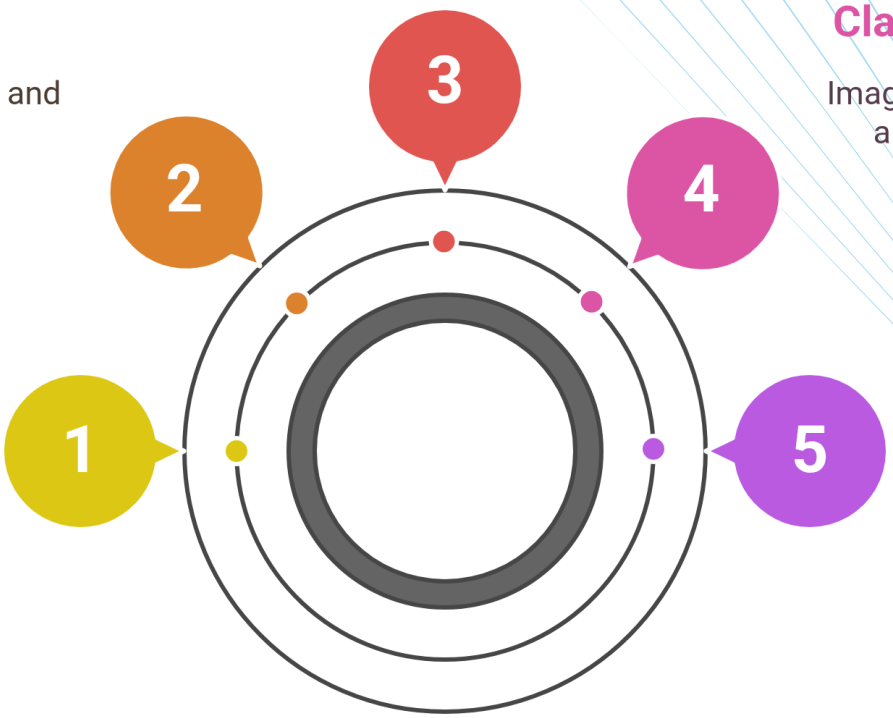
Voice Assistant Development

AI & Data Projects

Data Collection and Analysis

Vision & Classification

Image Recognition and Training



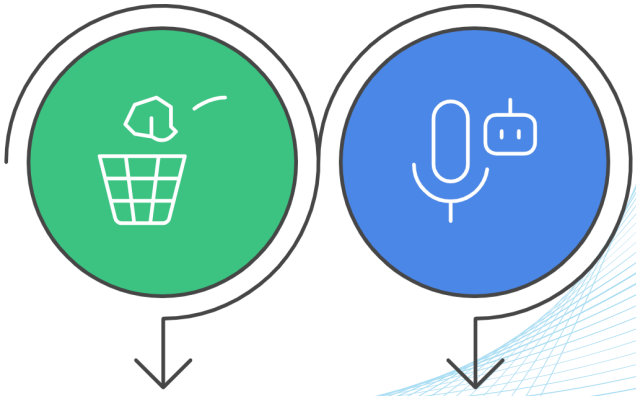
Capstone Project

AI for Good Innovation

AI + Web

AI Model Integration into Websites

Featured Projects



AI Waste Sorter

Identifies waste categories using webcam

Voice Quiz Master

Asks questions and scores answers

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

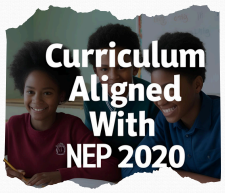
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

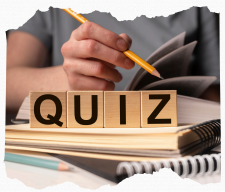
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
