About Coding Skills Academy

Coding Skills Academy is a premier platform that offers both online and offline courses, designed to help children and teens master coding, AI, and essential 21st-century skills. Our interactive, hands-on lessons focus on real-world projects that not only teach valuable technical skills but also ignite creativity, critical thinking, and problem-solving abilities.

Our Mission

Our mission is to empower young minds with the knowledge and skills needed to thrive in an ever-evolving digital world. At Coding Skills Academy, we inspire the next generation to embrace technology, foster their creativity, and prepare for a future where innovation and digital literacy will be key drivers of success. We aim to build confident, capable learners who are ready to take on the challenges and opportunities of tomorrow's world.

Why Should Kids Learn Coding?

Coding Literacy

Essential skill in the digital age

Logical Thinking

Enhances problem-solving abilities

Creativity

Fosters imagination and innovation

Perseverance

Teaches resilience and patience

Future Readiness

Prepares for diverse career paths

Why Choose Coding Skills Academy

Personalized Mentorship

Individualized guidance from experienced mentors.

Coding Competitions

Opportunities to compete and test coding skills.

Thriving Community

A large network of young coders.

Doubt-Clearing Sessions

Dedicated sessions to resolve student queries.

Lifetime Access

Unlimited access to recordings and resources.

Why Learn AI & Coding?

Key Benefits:

1. Problem-Solving and Critical Thinking
2. Creativity and Logical Reasoning
3. Adaptability and Confidence
4. Innovation and Teamwork

Curriculum Features

1 NEP 2020 Alignment

Expertly designed curriculum aligned with NEP 2020 guidelines.

2 BIDE Model

Curriculum based on the Broad, Inspiring, Deep, Efficient model.

3 STEAM Integration

Integrates Science, Technology, Engineering, Arts, and Math concepts.

4 Project-Based Learning

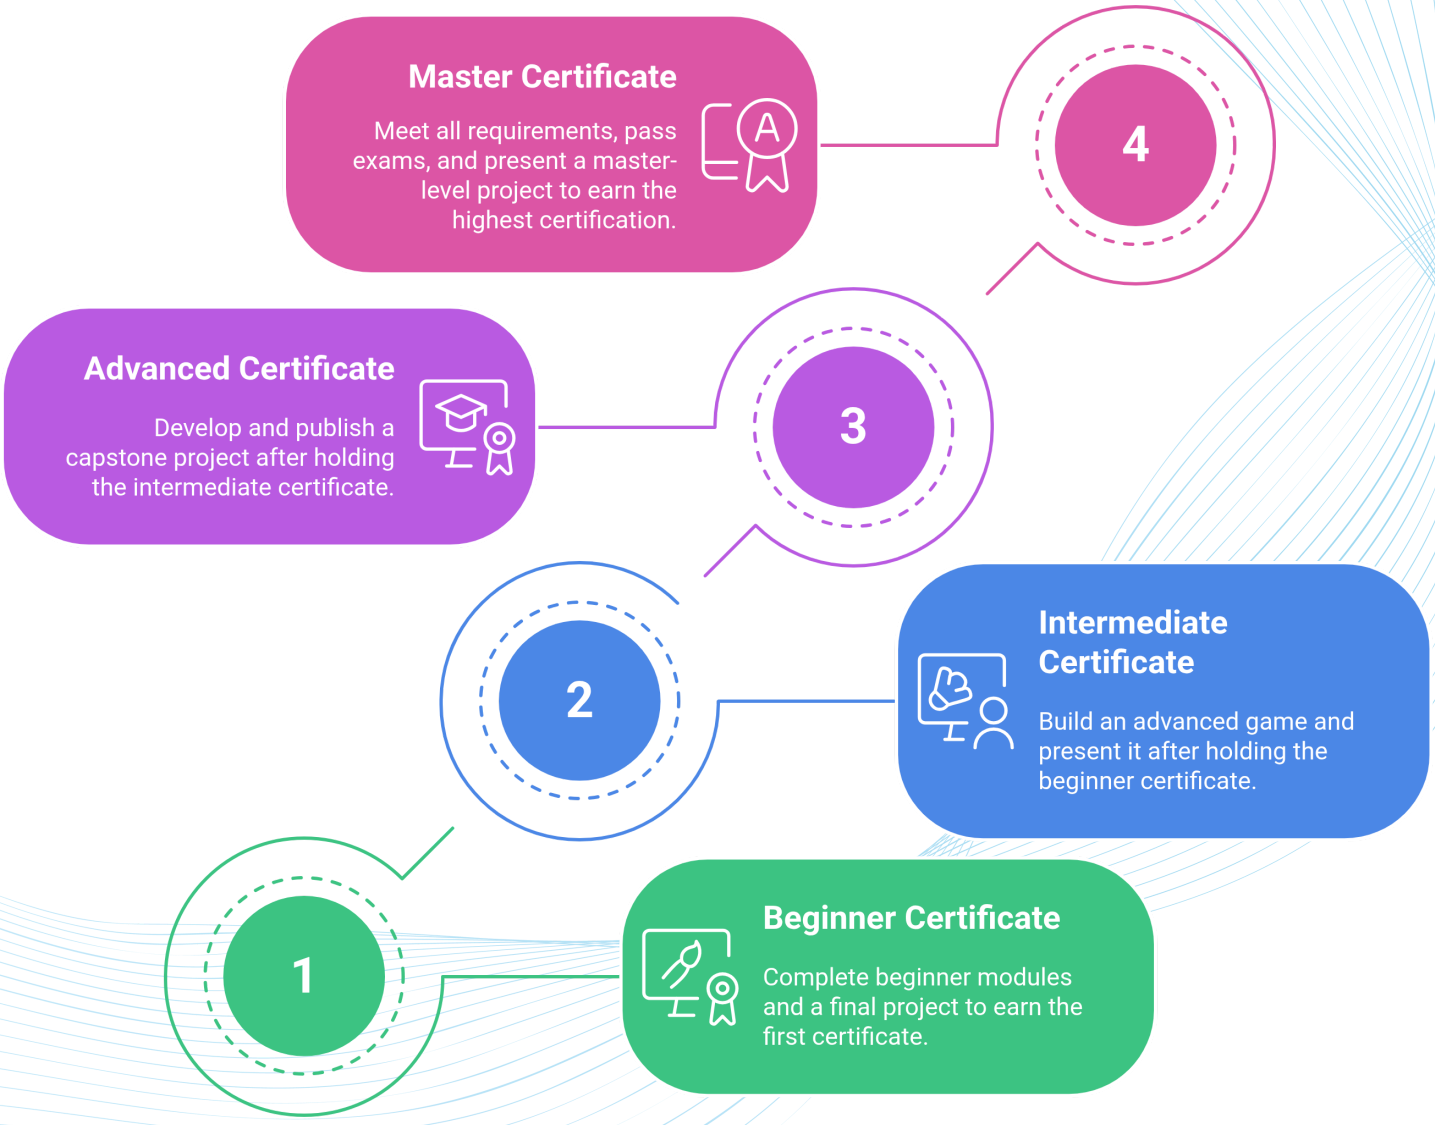
Offers project-based learning in game, app, web development, and more.

Scratch Specialised Course – Overview

A perfect course for kids who want to learn coding through stories and games using Scratch. This level focuses on introducing them to the basics of coding, animations and simple game logic.

📚 48 Classes
🎮 5+ Projects
📖 8+ Quizzes

Rising Techies Scratch Certification Path



Scratch Specialised Course – Overview

Key Learnings

- ✅ Understanding Scratch Interface
- ✅ Making animations & stories
- ✅ Loops and conditions
- ✅ Basic game elements

Achievements

- ✅ Learn to create your own game
- ✅ Build problem-solving mindset
- ✅ Confidently present your projects
- ✅ Scratch Beginner Certificate

Level 1 – Beginner
(16 Classes → 5 Modules)

5 Final Project

Showcase a completed Scratch story/game for certification.

4 Maze Challenge

Complete a keyboard-controlled maze game.

3 First Mini-Game

Build a basic interactive game with scoring.

2 Motion & Animation

Develop animated stories with timed movements.

1 Scratch Basics

Learn the interface and create simple animations.

Featured Projects

Catch the Apple

Build a game to catch apples

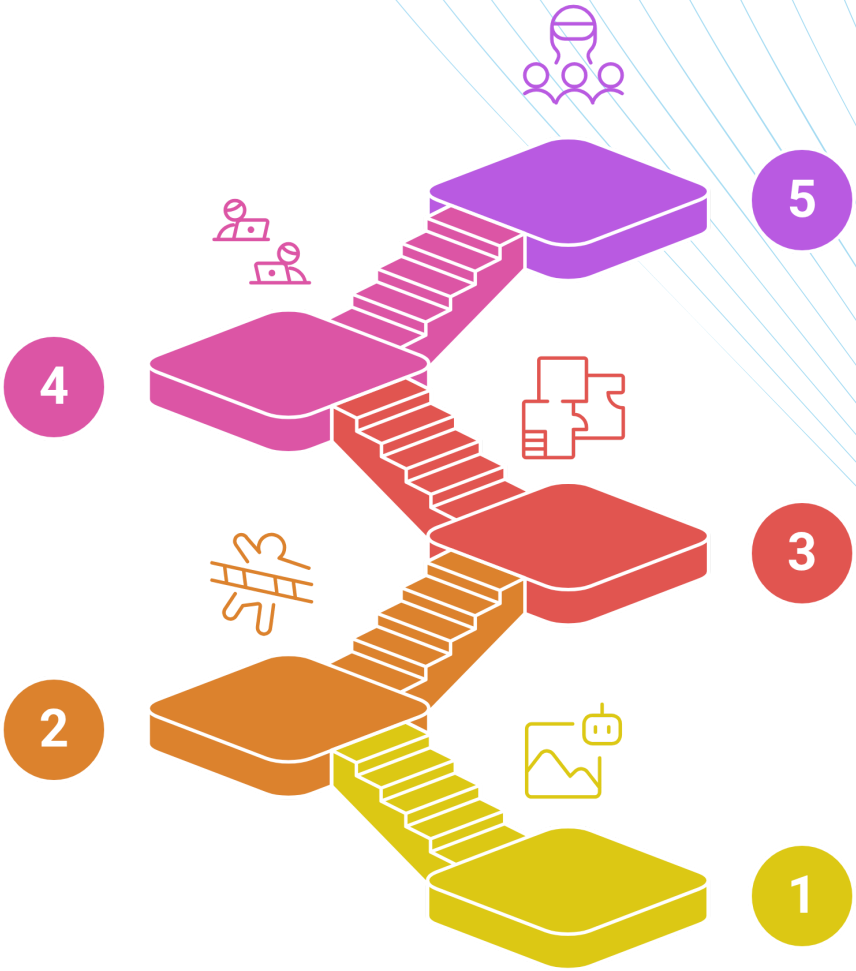
Animated Story

Create a short animated story

Made with Napkin

Scratch Specialised Course – Overview

Level 2 – Intermediate
(16 Classes → 5 Modules)



5 Final Project

Design and present an original game to earn Level 2 certification with advanced features.

4 Multiplayer Setup

Implement broadcast messaging, 2-player controls, and score tracking to develop a competitive 2-player game.

3 Puzzle Designer

Use variables, boolean logic, and inventory systems to create an escape-room style puzzle game.

2 Platformer Game

Develop gravity/jump physics, level design, and basic enemy AI to build a working platformer game.

1 Advanced Animation

Learn cloning, costume sequencing, and parallax effects to create professional animations.

Featured Projects

Platformer Game

Develop a platformer game featuring jump physics, enemies, and multiple levels.

Escape Room Game

Build an escape room game incorporating puzzles and an inventory system.

Scratch Specialised Course – Overview

Level 3 – Advanced
(16 Classes → 5 Modules)

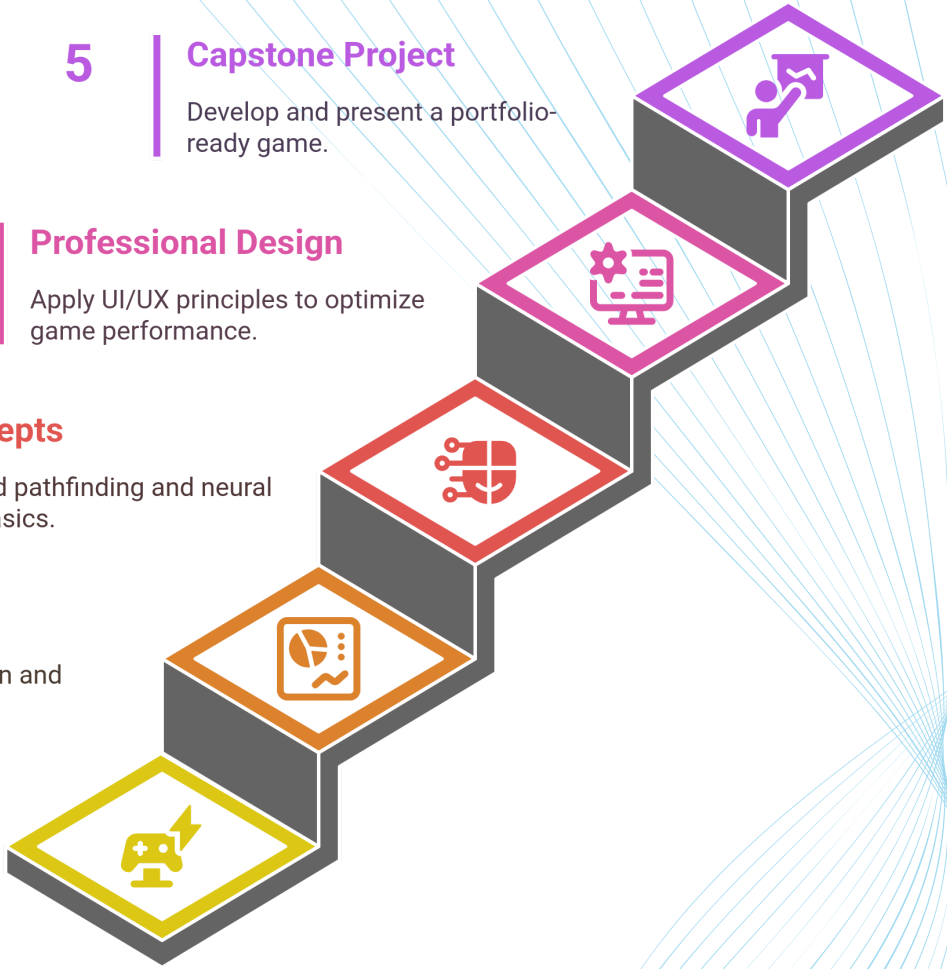
5 Capstone Project
Develop and present a portfolio-ready game.

4 Professional Design
Apply UI/UX principles to optimize game performance.

3 AI Concepts
Understand pathfinding and neural network basics.

2 Data Projects
Explore data visualization and cloud data simulation.

1 Scratch + Hardware
Learn to integrate physical controllers with Scratch.



Featured Projects

Game with AI
Develop a game featuring enemies controlled by artificial intelligence, utilizing pathfinding and decision trees.

Weather Dashboard
Construct a weather dashboard that incorporates cloud data and presents it through effective visualizations.

Top Benefits of Learning at Coding Skills Academy

1. 1:1 Personalized Learning

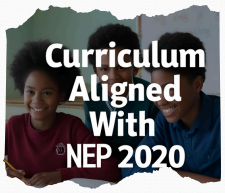
Every child learns at their own pace. Our one-on-one sessions and small batch sizes ensure personalized attention and mentorship from expert instructors

2. Hands-On, Project-Based Learning

No boring lectures–kids learn by creating real games, apps, websites, and AI projects. Learning becomes practical, exciting, and deeply effective.

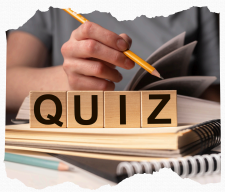
3. Flexible Learning Options

Whether your child prefers a solo session or thrives in a group, we offer both formats online to suit every learning style.



4. Curriculum Aligned with NEP 2020

Our courses follow the latest National Education Policy and integrate STEAM principles (Science, Tech, Engineering, Arts, Math) for holistic development.



5. Gamified Classes and National Competitions

We use quizzes, challenges, leaderboards, and real competitions to keep motivation high and learning fun.

6. Expert Mentors, Not Just Tutors

All our instructors are trained professionals with real-world experience. They guide, mentor, and inspire each student beyond the screen.

7. Doubt-Clearing Sessions & PTMs

We regularly conduct doubt sessions and parent-teacher meetings to ensure students stay on track and parents stay in the loop.

8. Lifetime Access to Recordings and Resources

Students can revisit classes, explore extra content, and access bonus resources even after the course ends.

9. Structured Learning Paths with Certificates

Our tiered paths (Junior Coder → Rising Techie → Tech Leader) offer 100+ to 450+ real projects, with certifications at every stage.

10. A Growing Student Community

Join a vibrant, active group of 15,00+ learners across India. Students share projects, collaborate, and grow together.

Students and parents love Coding Skills Academy

Meena Sharma
Parent

My son used to play games all day—now he builds them! Coding Skills Academy turned his screen time into skill time. The teachers are patient, and I get regular updates on his progress. Best decision ever!

Aarav Jain
Student

I never thought learning coding could be so fun. We built our own game in just 3 weeks! The projects are cool, and my mentor is super helpful. Now I want to learn AI next.

Rakesh Verma
Parent

The personalized attention and structured lessons really impressed me. My daughter lacked confidence in tech, but now she codes with ease. She's even teaching me a few things!

Kavya Mishra
Student

I've done online courses before, but nothing like this. It's so interactive and practical. I created a portfolio website and even got a certificate I can use in school competitions!
